...Quality research begins here

About Us
The International Institute for Policy Review and Development Strategies (IIPRDS), Nigeria is a member of First Assured Brilliant Intl Limited, incorporated under the Companies & Allied Matters ACT of the Federal Republic of Nigeria. The Institute is a non-partisan organization, independent of government and other bodies. Since incorporated in 2013, IIPRDS has made significant contributions in quality research and international standard publications. IIPRDS has organized several international research conferences and published proceedings in International multi-disciplinary journals indexed and domiciled in reputable Universities. Special issues are published in the African Development Charter series; a strategic economic and policy blueprint for Africa development. We conduct our work with strict independence, objectivity, and non-partisanship. See website: http://www.internationalpolicybrief.org

Vision/ Mission
To be the world's leading research and publishing Institute on policy review and development strategies. Through independent, collaborative and institutional research, review existing development policies especially in developing economies of the world, research into evidence-based strategies to advance new measures for achieving sustainable development.

Research Focus
In affiliation with national and regional governments, nongovernment organizations, the civil societies, research organizations and Universities, Africa's Development has been central in the Institute research programmes. Through clearly identified priority projects, IIPRDS works within the following focal areas,
1. Initiates research projects for Africa development
2. Organize research workshops, seminars, and conferences
3. Mobilize institutional supports for research implementation
4. Train researchers to enhance their capacity and technical base
5. Publish and index research findings in peer-reviewed Journals and readings
6. Provides professional technical and operational support for research in Africa
7. Establish interaction with beneficiaries of research findings for enhancing research relevance and adoption.

Research Conferences/ Journals
Research conferences are central to the activities of the Institute. The Conferences provides an opportunity for scholars to interact, share knowledge and strategies for advancing the course of development. IIPRDS adopt a multidisciplinary approach and work with an international network of partners to develop research themes which we actively seek to see applied in development policy and practice.
IIPRDS adopts a flexible approach to improve technical skills of local researchers, allow for regional determination of research priorities, strengthen national and international institutions concerned with economic policy research, and facilitate closer ties between researchers, institutions, and agencies who work within the purview of its research focus as well as policy makers. In doing this, IIPRDS supports networking and knowledge sharing between scientific, academic, and development communities among developed and developing countries. The conferences also provide an opportunity for training and capacity building for researchers.

IIPRDS international journals are published and indexed in 3 directories;
1. Science Publishing Corporation (SPC) Germany
2. International Scientific Research Consortium (ISRC) United Kingdom and
3. International Journals of Advanced Scientific Research (IJASR), Nigeria, Nairobi, Ghana and Tanzania. IJASR are online international open access peer review scholarly journals. Click this links for published Journals:
http://www.internationalpolicybrief.org/journals

Directorates of Policy & Research
The Institute has Research and Policy Directorates. The Directorates are coordinated by the AFRICAN RESEARCH COUNCIL ON SUSTAINABLE DEVELOPMENT (ARCSD), with project offices in University of Ibadan, Nigeria, University of Ghana Business School and Kenyatta University, Nairobi.

1. International School of Advanced Research Study (ISARS).
ISARS study curriculum is broad based and shares research content with that of leading world-class Universities offering courses in Research Methodology; University of Illinois, Chicago, University of Amsterdam, University of Liverpool, London and the University of Nebraska, Lincoln. It partners with institutions to train and certify researchers on various themes in Research Methodology and Statistical Techniques. The course is 100% online and it is flexible. English is the official language of study. The course will facilitate thinking that is logical, reading that is critical, and writing that is clear, simple and engaging. The learning outcome is improved professional skills in research, teaching and quality publications.

2. International School of Business and Entrepreneurial Study
ISBES provides students with basic and advanced business management concepts and entrepreneurship principles required for a successful career in the management or ownership of a small-to medium and large-sized business. The school operates Online and Campus studies. It develops young entrepreneurs, offers certificate, degree and graduate studies as well as mid-level and senior level executives International Executive Certificate Programmes.

Key Competencies
Our learning and development solutions are designed by scholar-practitioners who have a rich mix of industry expertise and research in specific disciplines and sectors. Through many of our discipline-specific curricular designed, implemented and monitored by our Professional Business Research & Academic Board drawn from a mix of local and international professionals, we help in the development of professionals who contribute to the overall organisational learning and culture that create sustainable systems, congruencies and performance.
Solving Employer Challenges
We work at building human capacities and improving staff performance, address skills shortages, develop talented employees or increase loyalty and employee retention, boost employee attitudes, enhance work commitments, effectiveness or efficiencies in meeting critical business objectives. In doing this, we adopt a style of theory-practice knowledge fusion to enhance improved organisational performance by applying sound academic theory to rich practical work-based experiences.

CRERDS provides functional development and training in Entrepreneurship and Renewable Energy Technologies for sustainable development. In collaboration with the Kuwait Foundation, the Centre will soon launch the International School of Energy Study.

Our Professional Team: Professional Research Council
The Institute is home to approximately 150 researchers affiliated with thematic research clusters, 50 knowledge professionals, 25 professional staff and about 95 students at any one time. Members of the Institute research and professional team are drawn from international universities and reputable research organizations. The Institute has a seasoned and experienced Multi-disciplinary International Professional Editorial Peer Review Board. The board operates a blind peer-reviewed system. All submitted manuscripts are reviewed initially by the internal editorial process. Manuscripts are evaluated according to the following criteria: material is original and timely, writing is clear, study methods are appropriate, data are valid, conclusions are reasonable and supported by the data, information is important, and the topic has social and empirical relevance.

Technical and Operational Support to Research Organizations
IIPRDS international professional and technical research team provides institutions and organizations with operational support for research in Africa. Among other things, the team handles project design, management, and budgeting; questionnaire development on a range of social and economic issues; serving as a liaison between the Center and project stakeholders including subject matter experts and funders; handles data collection, survey analysis, and report writing.

Research Dissemination through IIPRDS Electronic Library
We aim to disseminate research to as wide an audience as possible. Our research has strong academic credibility and is published in top journals. Research findings are indexed in the IIPRDS electronic library. The electronic library was established to manage, disseminate and preserve where appropriate, research materials and also provide access for purposes of advancing research studies and learning. The library provides the open access to electronic resources through the Internet and offers assistance to librarians in navigating and analyzing very large amounts of information with a variety of digital tools.

Exchange of Idea Initiative (EII)
The Institute currently operates an Exchange of Idea Initiative (EII) with other International Research Organizations and Libraries to enhance wider researcher of its journals. With this initiative, Academic Journals are published in various Countries by reputable publishers and research organizations not minding where the conference is held. This dynamism has diversified and improved the quality of the Institute Journals, enhanced International acceptance by indexing research agencies, built confidence in conferees and enhanced their disciplinary relevance.
The failure of much of the world to meet the first Millennium Development Goals of eradicating extreme poverty and hunger by 2015 highlights the need for research to go beyond the measuring of poverty and give more attention to its causes and dynamics.

This research project aims at both exploring new empirically based findings and developing theories on the causes of poverty, especially urban poverty or poverty at the interface between the urban and rural. We welcome critical perspectives which pay attention to the intersection between micro and macro levels of analysis, including ethnographic methods and local case studies with relevance for larger issues as well as larger-scale studies with theoretical implications for micro-level research. Possible themes of papers include, but are not limited to, poverty's links to the following areas in the so-called developing world:

- Conceptual issues in poverty reduction and equity
- Philosophical, empirical and theoretical perspectives
- Inequality, unemployment and economic opportunities
- Development interventions, education, gender & development
- Economy: micro-credit, capital, livelihoods, income generation
- Improving the quality of institutions and economic management
- Enhancing the competitiveness and productivity of African economies
- Rural technology, industrialization, infrastructure, and service delivery
- Environmental issues: climate change, land reform, water and sanitation

CHAPTER CONTRIBUTIONS:
Contributions will be published in a BOOK OF READING; African Development Charter Series. Manuscript must either be conceptual or empirical. The length should be between 5000 and 8000 words. 6th edition APA referencing style is recommended for the paper. Manuscripts should be submitted via email to africanissues@rocketmail.com. Deadline: June 30th, 2017.

Welcome!

International School of Advanced Research Study

We are glad to introduce you to our Online Professional Certificate and Degree courses on “Research Methodology and Statistical Techniques” in affiliation with International Asian Universities and European Research Organisations. We believe you are the right person for this course. It is 100% online and flexible.

Earn a Professional Certificate & Degree in
RESEARCH METHODOLOGY & STATISTICAL TECHNIQUES

International School of Advanced Research Study (ISARS) partners with institutions to train and certify researchers on various themes in Research Methodology and Statistical Techniques. We wish to partner with your University by organizing research training workshop for graduate students and academic staff. A detailed proposal will be sent to you at your request. Send an email or call the Ag Registrar for inquiries.

Timeline for Manuscript Corrections and Journal Publication

The timeline for manuscript assessment and publication is as outlined below:

1. The Plenary/Technical session is compulsory for all conferee. You are advised to note the comments pointed out by the Chairman of the Technical Session and other members of the plenary group. This will help you effects corrections as expected.

2. Corrections of manuscript(s) (full papers) must be effected and submitted within 2 weeks after the conference. All submission must be made to: innovative.research@yahoo.com

3. The Conference Professional Peer Review Editorial Panel (CPPREP) will meet 2 weeks after the league conference to review papers. This usually takes one week, after which the papers are forwarded to Google scholar International Standard Peer Review Research Council for professional and disciplinary blind peer review and plagiarism check. Usually this takes about 3 weeks.

4. Letter of Papers Acceptance and Journal Publication will be issued to author(s) on the 6th week after the conference. Acceptance will be in three forms:
   a. After peer review, papers with less than 50% accuracy level will be rejected. Author(s) will be required to re-write the paper based on observations.
   b. Secondly, papers with 51 – 80% accuracy level will be accepted for publication, but with minor corrections effected by the institute.
   c. Finally, papers with 81 – 95% accuracy level will be accepted for publication with minor corrections effected by the institute.

5. On acceptance of paper for publication, author(s) will be required to make PAYMENT for paper publication/ pagination (hard print and online) and courier. Payment must be done within 2 weeks of notification of acceptance. Authors will receive their published journals within 10 weeks after the conference.

6. Accepted papers will be published in International Scientific Disciplinary Research Journals with high level Impact Factor (in hard print and e-version). Published journals will be indexed in Google scholar and other online research directory.
Guidelines for Manuscript Submission

Important Notice
Submitting your manuscript for assessment and publication in any of the International Journal Series means that your work has not been published elsewhere in any other journal, book or in a book chapter, be it printed online (except in the form of an abstract or an academic thesis). The editor(s) of the journal(s) have the right to edit or to alter all contribution, but authors of the submitted work will receive proof before the publication of their work.

Submission of Manuscripts
Manuscript should be submitted to the Editor in Chief, typed in English with Times New Roman font size 12, doubled space with 1” margin at all sides of A4 paper. Manuscripts should not exceed 14 pages. Articles for publication should be sent to the Editor, International Standard Research Publishing through the journal.

E-mail: innovative.research@yahoo.com

Manuscript should be legibly written with clear symbols, drawings, photographs, chemical structures to ensure clarity and easy reproduction. Authors are urged to pay attentions to tables, figures and references which should be done in the correct format and appropriately cited in the main text.

Format of Paper
The paper should include: Title, author(s) name(s) (surname in full) and address(es), an abstract not exceeding 250 words, a few key words and the main paper. The main paper should have an Introduction, Materials and Methods, Results and Discussion, Tables and Figures, Plates, Conclusion, Acknowledgment, References. If the paper has more than one author, the first on the list is the Correspondence author.

References
The reference style should be APA format.

Review Process
Articles for publication will be peer reviewed by 2 or 3 reviewers to ensure accuracy. Guided by the reviewer’s comment on a paper, the decision of the Board is final.
Copyright
Upon acceptance of a paper by the journal, the author(s) have automatically transferred copyright of the paper to International Standard Research Publishing. The transfer will ensure widest possible dissemination of information.

Charges
Manuscript must be submitted along with a processing fee. Upon acceptance of a paper for publication, the corresponding author must submit the corrected paper and pay a publication fee of $200 (USD) only. Corresponding authors shall receive one copy of Journal and could also download articles from the Journal's website.

Publication Ethics and Publication Malpractice Statement
Publication decisions: The editor is responsible for deciding which of the articles submitted to the journal should be published. The editor may be guided by the policies of the journal's editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editor may confer with other editors or reviewers in making this decisions.

Confidentiality: The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Abstract

The study looked at tax incentive as a real modifier for industrial growth and development in Nigeria. The study was primarily undertaken to evaluate the effectiveness of tax incentives in developing the Nigerian economy and the extent to which individuals and companies have been responding to the incentive scheme, and how these incentives have been stimulating and motivating these bodies on employment opportunities. An empirical study was employed by using a well-structured questionnaire to assess the relationship that exists between tax incentives, industrial development and economic growth among the four different incorporated industries and firms selected in Jos, Plateau State having considered the type of incentives offered to them by the government. A total number of seventy-five (75) questionnaires were specifically administered to the top and middle management staff (CEO's managers and Accountants) of these industries and firms and a total number of (60) sixty were retrieved. The hypotheses formulated were tested by using the chi-square (X²) method and it was discovered that the tax incentives granted were inadequate to sustain the desired development for which it was granted. Finally, recommendations were made as regards the variables which will enhance tax incentives towards industrial development and economic growth because 'Tax incentives create employment opportunities for the people and it helps to fight economic depression and inflation thereby increasing the equitable distribution of income and wealth. So, the government should provide such tax incentives in order to boost development which will bring about an increase in employment opportunities and also cause an improvement in the economy.

Keywords: Tax incentives, Industrial development and Economic development
Abstract

The effect of plagiarism has brought a lot of academic dishonesty among the academicians. The effect is directly related to the millions of electronic resources on the internet. Plagiarism affects not only the academic staff but the integrity of the University. Turnitin is a web-based software that is used for plagiarism detection and is meant to aid and promote originality of research publication. Despite the importance attached to this software, many academicians in Bayero University Kano have partial knowledge about the software and the extent of the use to detect plagiarism. The researcher investigated the level of awareness and perception of turn-it-in in detecting plagiarism misdemeanours in Bayero University Kano. The study was quantitative in nature and used survey research method, with the questionnaire as the instrument of data collection. A sample of 150 respondents of academic staff was used. The findings revealed that the level of awareness on the existence of the software among the academicians of Bayero University Kano is average. But the extent of how the software is used in detecting plagiarism is significantly low. To overcome these problems, the study recommends massive awareness campaigns and training on how to use turn-it-in software by the University management.

Keywords: Awareness, Perception, Academicians, Turn-it-in, Plagiarism.

Shaapera Simon Aondohemba, Mohammed, M. Haruna & Yecho Elizabeth Ihugh

Abstract

This paper examines the role of government (politics) towards rural development (the economy) in Dutsin-Ma local government Area of Katsina State-Nigeria. The paper employs both primary and secondary sources of data to get the findings while political economy and historical materialism are used as frameworks in the analysis of the issues concerned. In this work, rural development could be seen as the integrated approach to food production as well as physical, social and institutional or infrastructural provisions with the ultimate goal of bringing about both quantitative and qualitative changes which result in improved living standard of the rural population. Embarking on rural development is very important for sustainable development in Nigeria considering the fact that more than two-third of Nigeria's population lives in rural areas where they experience a lot of misery, poverty and under-development. Reflections on the policies of Government and other related experiences in rural development in most parts of Nigeria over the years indicates that not much has been achieved even before and after independence as there exists a sharp contrast between policy formulation and its implementation. The resultant effect becomes more hardship and poor standard of living among the rural dwellers. This paper therefore x-rays the various approaches to rural development by highlighting the strengths and weaknesses of each before linking up with the specific cases in Dutsin-Ma local Government area of Katsina State. It has been found that government's failure in the various rural development strategies emanated from lack of national philosophy or ideology, lack of cohesive identity, inadequate community participation and lack of grassroots planning as well as inability of the government to optimize local resources, among other problems. Consequently, the study recommends that there should be adequate supply of infrastructural facilities, small and medium-scale industries and political empowerment of the rural people by government which would go a long way in improving the living conditions of the generality of the masses in the localities of the areas under consideration.

Keywords: Awareness, Perception, Academicians, Turn-it-in, Plagiarism.
Negative Effect of Poverty on Socio Economic Development in Nigeria

Mohammed Wali Mansur
Department of Public Administration
Bauchi State University Gadau, Bauchi State, Nigeria

Abstract

The paper examines the negative of poverty on socio-economic development in Nigeria. In analyzing the issues raised, the paper anchored on a approach using social exclusion theory. And using mixed paradigm (quantitative and qualitative) and specifically content analyzing the paper established among others that, poverty has negatively affect the socio-economic development, however a lot of efforts have been made in poverty reduction through poverty alleviation programs in Nigeria. However nothing much had changed in the living conditions and standards of the people that in long run will boost the development of socio-economic in Nigeria. The paper concludes that poverty alleviation in contemporary Nigeria requires policies geared toward (sustainable) socio-economic development. Thus there is a need for given priority in educational reforms, vocational training, water sanitation, health care delivery, agriculture, housing and power generation. These should be anchored on collectivism and not individualism with the political will giving to make a landmark achievement.

Keywords: Poverty, Socio-economic and Sustainable development

Kabiru Ubale
University Library
Bayero University, Kano, Nigeria

Abstract

This paper attempts to provide historical survey of the development of archival legislation in Nigeria, its also provides a systematic review of the provisions of National Archives Act of 2004 as a records and archival management legislation in Nigeria. In Nigeria there exist records and archival management legislations ranging from records and archival ordinance of 1957, the National Archives Decree of 1992 up to the present democratically amended National Archives Act of 2004. Records and archival legislation exist primarily to serve as a bench mark and model of action among custodian of public and private records including archival institutions. The National Archive Act of 2004 provides details guide line for effective and efficient management of public and private records including presidential records. The paper therefore analyses and highlights the major provisions, strengths and weaknesses of the Nigerian records and archival legislation as records and archival management framework. It also makes some recommendations on how records and archives legislation can be fully implemented in managing public and private records at both federal and state owned institutions.

Economic Diversification and Infrastructural Development as Effective Strategies for Poverty Eradication in Africa: the Nigerian Perspective

Jooji, Innocent Tyomlia, Okwara, Emmanuel Chukwuma & Oguchi Chinweuba Benjamin

Department of Political Science and Diplomacy, Veritas University, Abuja

Abstract

This paper interrogates the issue of poverty eradication through economic diversification and infrastructural development. Data is obtained from secondary sources which include books, magazines, journals, periodicals, internet etc. The theory of diversification by Jean Limbs is adopted as the theoretical framework while the mode of analysis is qualitative. It runs in parts- introduction, the problem, theoretical perspectives, stages of diversification in emergent economies, methodology and analysis, conclusion and recommendations. The major findings of the study is that as a developing economy, Nigeria and indeed other African economies should concentrate on production and industrializing of commodities in which they have natural endowment and comparative advantage over other geographical areas. It concludes that government should first conduct a survey to ascertain which region is endowed with what products and how to boost such productivity. This will boost employment opportunities thus reducing poverty.

Keywords: Poverty, Infrastructure development, Economic diversification, Employment, Comparative advantage.
Traditional Farm Settlements and Sustainable Development: a Case for Agro-Based Rural-Urban Policy Intervention towards Capacity Building for People and Local Communities in Nigeria

Elijah Babasola Afolabi Agbaje, PhD
Department of Political Sciences,
Osun State University, Osogbo, Nigeria

Abstract

Nigeria is an agrarian nation with great prospect for full employment and food security. In fifties up to early seventies, through agriculture, Nigeria had solid platform for sustainable development generating somewhat full employment and food for old and young, and in addition, providing essential raw materials for industries and export market. Regrettably, at this point in the 21st century, the country, against the late 60s prediction by Stolper is one of the starving nations of the world with mass of idling manpower. Increasing impact of gentrification on those at the lower rungs of the society further reveals the stark fear that more of the Nigerian potential productive populace, against all intents of sustainable development, will become more cripplingly idle, starved and homeless. While South Korea with eight percent of her population in farming still feed her populace, service her industries and foreign markets with agro outputs, Nigeria, as things now stand, despite great potentials is unable to feed her populace. Towards rekindling the hope for sustainable mass development, this paper deploring both historical and survey methods, examines the paradoxical nexus of negative effects of generational shift in agro-allied preoccupation and the trajectories of abandoned opportunities in one of the serially located traditional farm settlements within Ijero Local Government Area of Ekiti State, Nigeria. The aim is to determine whether or not resuscitation of traditional farm settlements as a component of readily available developmental factors could count as a means by which the problems associated with unemployment and mass underdevelopment can be mitigated.

Africa and the Global Artisanal Mining Crisis: Strengthening Solid Mineral Development as Rural Development Strategy

1Darma, M. R & 2Kankara, I. A  
1Pleasant Library and Book Club, Katsina  
2Department of Geography and Regional Planning, Federal University Dutsinma

Abstract

Since the first publication of An Essay on the Principles of Population in 1798 by Thomas Malthus, there have been attempts by researchers and policy makers towards the study of Demography and natural resources. However, recent researches and happenings indicate that natural resources and in fact Solid minerals serve as the basic needs to cater for the developments of rural areas, especially in the Developing and the underdeveloped nations. Africa is at the forefront in terms of natural resources abundance but shortage due to primitive technology involved in exploiting them, despite the antiquity in artisanal mining in the continent and its potentials in terms of land and labor. Inability to structure mineral resources development in Africa was attributed to government's negligence. The methodology adopted for the study is by primary source of data that involves field visits of some remote areas in Nigeria and survey of the affected areas, and the secondary data. This work does not accept the problems of mining and exploitation of solid mineral's as a factor in Africa's mineral resources shortages, but rather further looks at other contributing factors such as influence of foreign powers towards hindrances in the sector development in the continent and the entire globe. The work then recommends that Governments policies should be directed towards improving the mining sector in Africa. The data derived during the study were carefully interpreted.

Application of MADM Approach to the Choice of Poverty Reduction Strategy (PRS) using SDG Indicators

'Darma, M. R & 'Kankara, I. A
1Pleasant Library and Book Club, Katsina
2Department of Geography and Regional Planning, Federal University Dutse

Abstract

The seventeen (17) SDGs aim at addressing basic needs, especially, the needs of 1bn people of the world living in abject poverty. To adequately meet these needs and meet the goals, developing countries require an upgrade in the quality of their economic statistics. However, not only adequate and quality data is needed, developing countries need to understand (local) peculiarities causing poverty and develop their PRS policies, reflecting national and communal priorities. Again, as poverty and inequality are complex, understanding of how to organise and rank PRS following contextual capabilities to derive maximum benefits are necessary. This paper, therefore, explores multi-alternative decision making (MADM) approach to the choice of PRS using SDGs as primary factors. We surveyed the literature on PRS in Nigeria for major concepts/ideas in PRS. Using these ideas, researchers and practitioners on poverty reduction strategies were contacted as subject matter experts to answer a 54-page questionnaire we develop, using Analytic Network Process (ANP). A ranking of 9 alternative strategies was made. Three top-ranked alternatives were determined. The paper discusses ways policy makers can ensure optimum benefits on the top three ranked alternatives. Our approach and arguments are consistent and conducive to meeting SDGs, mainly, as careful consideration was given to the management of social contradictions that researchers of PRS indicate restricts effective implementation of past strategies in Nigeria.

Keywords: Poverty, Poverty reduction and Sustainable development
Abstract

Although various poverty reduction strategies have been designed and used in developing countries like Nigeria, the poor are still trapped in a vicious cycle of poverty while the rich appear to be in the virtuous cycle of affluence. The reason is inadequate understanding of causes and consequences of poverty on the one hand and the continued existence of treatable factors that keep people in poverty on the other. Factors such as violence, abuse, poor parenting, poor environment and general disorder may permanently impair cognitive ability related to impulse control, working memory and attention capacity. This in-turn affects self-control in day-to-day activities including in decision making resulting in material poverty and other deprivations. Using two poverty theories, the culture of poverty and ghetto poverty, this paper examines how the interaction of internal and external poverty conditions within individuals explains vicious poverty cycle. The article hypothesises that effective policies termed 'virtuous' poverty reduction strategies that aim at both 'cognitive' and 'material' poverty are essential for successful poverty reduction strategies in developing countries. In this respect, this paper reports on the result of a questionnaire guided survey conducted in 12 out of 19 Northern states. The survey targeted respondents who are adjudged poor (living below $1.50/day) and with a family of at least 3 in a total of 25 cities. Latent factors were derived and SEM models with historical factors used as mediators to determine the causes of respondent's perception of poverty. The results indicate that internal conditions such as childhood abuse lead to cognitive poverty whereas external conditions such as weak government may result in material poverty. From the results, we proposed suggestions on the way(s) to virtuous PRS.

Bolsa Familia and Socio-Economic Development in Brazil: some Political Economy Imperatives and Lessons for Poverty Reduction in Nigeria and other Third World Countries

Simon Aondohemba Shaapera, Simon O. Obadahun & Ken Richard Dodo

Abstract

This paper evaluates Bolsafamilia as a conditional cash transfer program for poverty reduction and socio-economic development in Brazil with some political economy imperatives and lessons for poverty reduction in Nigeria and other third world countries. The paper makes use of content analysis of existing literature on Bolsa Familia Program (BFP) in Brazil while Marxist' political economy approach is used as a theoretical framework in the explanation of the issues raised and lessons learnable for Nigeria and other Third World Countries. Incidentally, as one of Brazil’s celebrated social policy initiatives, launched in 2003, the conditional cash transfer program called Bolsa Familia Program (BFP) reaches 13.8 million families or about 48 million people and remains very inexpensive to operate. The BFP has helped to reduce poverty in Brazil and has improved social and economic outcomes for the poor. The BFP is well on its way to breaking the cycle of intergenerational poverty in Brazil. Most impressive is the fact that the BFP has successfully reached Brazil’s poorest of the poor families, societies, most vulnerable and socially excluded people. It is an example of how precise targeting can have a positive impact on not only improving the living conditions of the poor, but of the generality of the people in a society as a whole. BFP is a model of “reaching the hard to reach,” one that ought to be emulated and adapted in Nigeria and other third World countries of the World as recommended in this paper.

²Institute of Peace, Security and Governance
³Ekiti State University, Ado-Ekiti, Nigeria

Abstract

Women as the center of food security in every society, particularly Oloibiri community of Bayelsa state in Nigeria depend mainly on the environment to eke out a living as they have little access to and control over land. Environmental degradation and its attendant challenges of food insecurity pose a challenge to this. As a result, food security in term of availability, accessibility, utilization and stability were jeopardized due to the degraded environment. With the use of field research, this study interrogates the consequences of environmental degradation on oloibiri women's food security; in terms of availability, accessibility and utilization. It was discovered that environment degradation impacts negatively the availability and utilization of food in Oloibiri community. The situation has been persistent for some time making it more chronic than transitory in nature. On the other hand, education of women has no relationship with food security in Oloibiri, as against income. While employment and social status of women affects food availability than its utilization. Government should therefore empower the women such that their level of income can enhanced in order to attain food security in Oloibiri community of Bayelsa state.

Analysis of the Impact of Parents' Socio-Economic Background on Students Academic Performance in Sokoto Metropolis of Nigeria

Idowu, Omowumi Omodunni, Owoeye, Taiwo & Idowu, Oladele Olusegun

1Department of Economics, Ekiti State University, Ado Ekiti, Nigeria
2Institute of Peace, Security and Governance

Abstract

This paper analyses empirically the impacts of parent's socio-economic background on the academic performance of their children in Sokoto metropolis of Sokoto state of Nigeria. The objectives of the study were to evaluate the factors that influenced the student's academic performance and the relationship between the student's socioeconomic background and academic performance. To achieve this, the research uses primary data collected from 350 respondents out of the 4466 students of the schools in Sokoto metropolis using random sampling technique. Questionnaires were administered to the respondents and data collected was analyzed using regression analysis. The result shows that parent's socio-economic class; father's level of education and mother's level of education are the major determinants of the academic performance of students in Sokoto metropolis. The research recommends a vibrant poverty alleviation program for poor parents in Sokoto state.

Adamawa State Polytechnic, Yola

Abstract

Three decades ago, family planning was taboo in Nigeria and indeed in many African countries. Children were seen as gift from God and any attempt at birth control was considered sinful. Today, the climate of opinion has changed drastically in favor of family planning that community based distribution of contraceptives has a firm footing in many states. Family planning tries to find out how people can be informed and helped to have a number of children they want at the time they need. Men and women discovered that planned families are healthier and happier than unplanned ones. This paper examines the factors that lead couples to adopt family planning, history of family planning, family planning methods which include: Natural family planning, traditional family planning and modern family planning. The researchers draw a possible framework on which a population control programme could be developed and geared towards the general public.

Import Restriction in Nigeria: how Far has it Gone in Achieving the Stated Objectives?

Ahmed Halliru Malumfashi
Department of Economics,
Umaru Musa Yar’adua University Katsina, Nigeria

Abstract

This paper examined the benefits of imports restriction for a country with the objective of analyze the extent to which Nigeria’s restrictive policy has gone in realizing such benefits. The paper makes reference to the available literatures and statistical figures based on the performance of the key sectors of the economy before and after the implementation of the policy. The paper discovered that the results of the policy are mixed as per as the attainment of the above stated objectives is concern. The policy is fruitful for the development of agricultural sector as indicated by the rate of growth of the sector but retards the manufacturing sector as evidenced by a decline in its share of GDP due largely to the difficulty of sourcing foreign exchange to import the required capital and intermediate goods. The policy worsened unemployment currently but this is likely to be reversed in the medium and long runs as agricultural sector, the larger employer of labour, respond positively. But improving balance of payment has still remains a challenge because of the need to import capital and intermediate goods required by the manufacturing and construction sectors. Higher prices of locally made products make them highly uncompetitive with the result that import of finished product is still on the increase. Therefore, for the policy to yield the desired results there is need for the provision of input subsidy, effective marketing plans, guaranteed price and funding of the entire value-chain in the agricultural sector. Also, the monetary authority should make foreign exchange more available and measures should be taken further to narrow the gap between the official and the black market exchange rates. Temporary selective protection should be adopted rather than general protection approach.

Rebranding and Developing Nigeria: The Roles of Executives

Abdulrahman Abdullahi
Department of Public Administration,
Faculty of Social and Management Sciences,
Bauchi State University, Gadau

Abstract

The aim of this paper is to capture the role of the executives as Financiers, communicators, leaders, facilitators and so on in rebranding Nigeria for sustainable development. The paper relied on secondary source of data and content analysis was used in analyzing the data. The study discovered that there is synergy between executive roles and development. The study concluded that executives can play numerous roles such as the role of policy-makers, negotiators, facilitators in discharging their executive responsibilities. If the executives effectively played these roles, they will be able to combat the major ills to our development. These ills include corruption, nepotism, lack of patriotism and above all get rich quick syndrome. The study recommended that the orientation of our young one should be changed since individual is the foundation of all reforms, changes and development in the society. This is because there could be no hope of putting up a healthy, lofty and strong structure when its building block is weak and defective.

Examining the Application of Radiocarbon Dating to the Valuation of Cultural and Historical Assets in Nigeria: a Study of South East Nigeria

Esv. Chikezie Okoronkwo FNIVS
Department of Estate Management,
Federal Polytechnic Nekede Owerri,
Imo State of Nigeria

Abstract

Valuation has always been known to be an art as well as science of estimating the worth of tangible as well as intangible assets. It is the process of estimating what something is worth. In the words of Jacob (1996) “valuation is not astrology”. Lichfield (1993) noted that this art and practice of valuation is largely concerned with the investigations for, and the expression of, an informed opinion as to what price would or should be offered or paid for property rights under certain defined conditions. This study examined the application of radio carbon dating to the valuation of historic and cultural assets. It reviewed literature on archaeological interests and depended on quantitative data in assessing the impact of the application of radio carbon dating in assessing the value of assets of historic and cultural interests. Questionnaires and interview schedules were developed, administered and collated. Places of historic and cultural interests were visited and documented. Statistical tools such as the F Test and Regression techniques were adopted and relied upon in analyzing the data collected. The study brought to the fore, the underlying forces and factors that support the value inherent and intrinsic in assets of historical and cultural nature. It established the propensity of most valuation assignments resulting to over valuation or under valuation where the traditional approaches to value are employed in the valuation of these public goods; and concluded that though the traditional processes of valuation may be employed, the application of radio carbon dating in the valuation of these properties will condition the value estimates such that the underlying substance of the purposes which the property serves will be exhumed and better appreciated.

Statutory Auditor, Audit Practice and Credibility of Corporate Financial Reporting in Nigeria

Akomolafe, Johnson Adewale
Department of Accounting,
Ogun State Institute of Technology, Igbesa, Ogun State

Abstract

This research was carried out to examine the impact of contemporary audit practice on statutory audit excellence and effective financial management in Nigeria publicly quoted companies. In conducting this research, primary and secondary data were used. The research captured the opinion of respondents 46 audit firms in Lagos State and analysis was based on 41 copies of questionnaire returned. Test of hypotheses was performed using t-test, correlation and regression while the secondary data were sourced from journals and other literature documentation. The study was able to find a significant and positive relationship between audit practice, statutory audit and the quality of corporate financial reporting in Nigeria.

Ending Hunger and Poverty in Africa

Akai, Kevin Polycarp & Ukene, Daniel
KM 5, Ik-Uyo Rd, Essien Udim, AKS

Abstract

Ending Hunger & Poverty in Africa before or by the year 2030 demands corporate approach. It is a task that must be done. The first thing that must not be toiled with is “Productivity”. Everybody must be producing or in the process, that is, a training process so that he or she would produce food and other material needs beyond demand. The various governments in Africa has a responsibility to ending hunger and poverty in Africa, the Community Based Organizations (CBOs), Faith Based Organizations (FBOs), Civil Society Organizations (CSOs), Non Governmental Organizations (NGOs) whose back the International Donor Agencies squad to provide supports to African Nations have their responsibilities. Quoting Solomon Odike on the National Network of Radio Nigeria 4pm of 28th February, 2017. He stated that “Our Policy makers see themselves as far withdrawn from the people, exposing our people to hardship, poverty and all adverse conditions”. This statement was made by a Professor of Economics, VERITAS University, Abuja, Nigeria. This habit should be far from us. Every empowerment meant for our Youths henceforth must be on sustainable bases. Whatever is provided for our girls and our Women should be real and beams sustainability. A substantial support to liberate the person(s) concerned totally. Those taught or trained on cosmetics or soap production, jewelry and beads making, gifts materials, various artisan jobs like carpentry, battery charging, Mechanic, Auto – electrician; venturing into agriculture: Farming, fishery, poultry, live-stock raring, etc. Should team up with other to mass-produce and strategically market same, plow back the proceeds for further productions. A good and important point to note: platting perennial crops or the likes take years to produce: those involved in these areas should diversify. When they are less busy, they should take to frying akara and sell, bake chin-chin, buns, prepare dry meat for sale, etc. Team work is actually needed rather than struggling with individual strengths. The government in African nations should put modalities in place to make sure everyone produces. This paper lends credence on how the lowest income earner can produce what the masses need. Nobody, no matter the status and physical condition should be permitted to live as a street beggar. Encouraging begging in order for givers to receive rewards from God is not a religious teaching in a right direction.

Abstract

Interest in financing strategies is of importance in dwindling and recessive economies like Nigeria. There is need to understand the degree of risk associated with different financing strategies to be able to choose one whose risks can be more easily transferred or mitigated. This study aimed at appraising existing financing strategies in housing development in Nigeria. The objectives of the study were to identify preferred financing strategies for housing development, determine the relationship of preferred strategies with degree of risk associated with them and determine effect of financing strategies on housing development. A survey research design was adopted with questionnaires administered in Abuja and Kaduna to construction professionals. Data were ranked using mean scores and analyzed using regression and ANOVA. The findings showed the most preferred financing strategy in facilitating housing development is the public private partnership. The findings also show a strong association (R value of 0.651) between the degree of preference and degree of associated risks. Furthermore the findings established that financing strategies have significant effect on housing development in Nigeria. The study concludes that some innovative forms of the public private partnership and their application in housing development are yet to be understood. The study recommends that in order to enhance sustainability in housing development, Nigerian construction professionals should promote strategies that are inclusive in terms of value addition to housing development, and those strategies that help in repositioning and re-strengthening of financial institutions as well as strategies that offer investment incentives.

The Role of African Education towards Reducing Poverty and Hunger amongst Children Aged 10-19 Years: a Case of Nigeria

Ozioma C. Azubike & Professor Patricia E. Mbah
Home Economics Department
Michael Okpara University of Agriculture Umudike, Abia State Nigeria

Abstract

Poverty leads to hunger and hunger brings about malnutrition and undernourishment which affects the growth and development of children with the ages of 10-19 years. Poverty and hunger remains an alarming problem in developing countries of the world. Thus the need for qualitative education geared towards the reduction of this dilemma. Therefore the paper examines the role of African Education towards reducing poverty and hunger amongst children aged 10-19 years. The study was stated as: To examine the role of African Education towards the reduction of poverty and hunger in Nigeria, assess the existence and influence of poverty and hunger on children aged 10-19 years in Nigeria and determine the measure of reducing poverty and hunger amongst children aged 10-19 years. The population of study was Eight hundred and fifty two (852) students of Jss1 - sss3 students in Abia State Educational Zone. Two hundred (200) students of the same classes were randomly selected as the sample for the study. Questionnaire was the instrument used for data collection; the data was analyzed using descriptive statistics of mean and standard deviation. The findings revealed that African education should be a qualitative one that should be able to make the students self reliance and independent when graduating to enable them to generate income to fight against poverty and hungry. This is because all the items had a mean of 3.57, 3.26, and 2.2 respectively based on the findings it was therefore recommended that educationist, government and NGO's should enhance the quality of Education towards reducing poverty and hunger in Nigeria for achieving sustainable economy.
