The International Institute for Policy Review and Development Strategies (IIPRDS), Nigeria is a member of First Assured BrilliantIntl Limited, incorporated under the Companies & Allied Matters ACT of the Federal Republic of Nigeria. The Institute is a non-partisan organization, independent of government and other bodies. Since incorporated in 2013, IIPRDS has made significant contributions in quality research and international standard publications.

**Vision/Mission**
To be the world's leading research and publishing Institute on policy review and development strategies. Through independent, collaborative and institutional research, review existing development policies especially in developing economies of the world, research into evidence-based strategies to advance new measures for achieving sustainable development.

**Research Focus & Publication**
IIPRDS has organized several international research conferences and published proceedings in International multi-disciplinary journals indexed and domiciled in reputable Universities. Special issues are published in the African Development Charter series; a strategic economic and policy blueprint for Africa development.

**IIPRDS international journals are published and indexed in 3 directories:**
1. Science Publishing Corporation (SPC) Germany
2. International Scientific Research Consortium (ISRC) United Kingdom and
3. International Journals of Advanced Scientific Research (IJASR), Nigeria, Nairobi, Ghana and Tanzania. IJASR are online international open access peer review scholarly journals. Click this links for published Journals:
   http://www.internationalpolicybrief.org/journals

**Exchange of Idea Initiative (EII)**
The Institute currently operates an Exchange of Idea Initiative (EII) with other International Research Organizations and Libraries to enhance wider researcher of its journals. With this initiative, Academic Journals are published in various Countries by reputable publishers and research organizations not minding where the conference is held. This dynamism has diversified and improved the quality of the Institute Journals, enhanced International acceptance by indexing research agencies, built confidence in conferees and enhanced their disciplinary relevance.

We conduct our work with strict independence, objectivity, and non-partisanship.
See website: http://www.internationalpolicybrief.org
MEMBER
UNITED NATIONS-AFRICAN
International Partnership for Sustainable Development Goals

The United Nations African International Partnership for Sustainable Development Goals (UNAfrican IPRDSG) is a strategic research and policy framework of the International Institute for Policy Review and Development Strategies (IIPRDS) with support from UNDP, International Research Institutions and Universities. The strategic framework is designed to help Countries achieve the objectives of sustainable development goals through research interaction, policy determination and implementation framework.

Membership offers opportunities for research training, provision of technical support for International Research Projects in Africa, field study reporting, and publication of economic reviews in the African Development Charter Series.

Given this day 22nd February, 2019 at the University of Dar Es Salaam, Tanzania

Congratulations!

MEMBER
EXPERT TECHNICAL PANEL
FOR ASIAN-AFRICA’S POLICY REVIEW,
INVESTMENT & DEVELOPMENT PROFILE

Led by International Institute for Policy Review and Development Strategies (IIPRDS), International Universities and Industrial Partnership, the Panel examines policy framework and investment initiatives design to achieve goals of sustainable Development in Developing Economies of Asia and Africa. Policy outcome aims at strengthening institutions of development administration.

Welcome!

International School of Advanced Research Study

We are glad to introduce you to our Online Professional Certificate and Degree courses on “Research Methodology and Statistical Techniques” in affiliation with International Asian Universities and European Research Organisations. We believe you are the right person for this course. It is 100% online and flexible.

Earn a Professional Certificate & Degree in

RESEARCH METHODOLOGY & STATISTICAL TECHNIQUES

International School of Advanced Research Study (ISARS) partners with institutions to train and certify researchers on various themes in Research Methodology and Statistical Techniques. We wish to partner with your University by organizing research training workshop for graduate students and academic staff. A detailed proposal will be sent to you at your request. Send an email or call the Ag Registrar for inquiries.

Timeline for Manuscript Corrections and Journal Publication

The timeline for manuscript assessment and publication is as outlined below:

1. The Plenary/Technical session is compulsory for all conferee. You are advised to note the comments pointed out by the Chairman of the Technical Session and other members of the plenary group. This will help you effects corrections as expected.

2. Corrections of manuscript(s) (full papers) must be effected and submitted within 2 weeks after the conference. All submission must be made to:
   iiprdcsconference@gmail.com

3. The Conference Professional Peer Review Editorial Panel (CPPREP) will meet 2 weeks after the league conference to review papers. This usually takes one week, after which the papers are forwarded to Google scholar International Standard Peer Review Research Council for professional and disciplinary blind peer review and plagiarism check. Usually this takes about 3 weeks.

4. Letter of Papers Acceptance and Journal Publication will be issued to author(s) on the 6th week after the conference. Acceptance will be in three forms:
   a. After peer review, papers with less than 50% accuracy level will be rejected. Author(s) will be required to re-write the paper based on observations.
   b. Secondly, papers with 51 – 80% accuracy level will be accepted for publication, but with minor corrections effected by the institute.
   c. Finally, papers with 81 – 95% accuracy level will be accepted for publication with minor corrections effected by the institute.

5. On acceptance of paper for publication, author(s) will be required to make PAYMENT for paper publication/pagination (hard print and online) and courier. Payment must be done within 2 weeks of notification of acceptance. Authors will receive their published journals within 10 weeks after the conference.

6. Accepted papers will be published in International Scientific Disciplinary Research Journals with high level Impact Factor (in hard print and e-version). Published journals will be indexed in Google scholar and other online research directory.
Guidelines for Manuscript Submission

Important Notice
Submitting your manuscript for assessment and publication in any of the International Journal Series means that your work has not been published elsewhere in any other journal, book or in a book chapter, be it printed online (except in the form of an abstract or an academic thesis). The editor(s) of the journal(s) have the right to edit or to alter all contribution, but authors of the submitted work will receive proof before the publication of their work.

Submission of Manuscripts
Manuscript should be submitted to the Editor in Chief, typed in English with Times New Roman font size 12, doubled space with 1” margin at all sides of A4 paper. Manuscripts should not exceed 14 pages. Articles for publication should be sent to the Editor, International Standard Research Publishing through the journal.

E-mail: iiprdsconference@gmail.com

Manuscript should be legibly written with clear symbols, drawings, photographs, chemical structures to ensure clarity and easy reproduction. Authors are urged to pay attentions to tables, figures and references which should be done in the correct format and appropriately cited in the main text.

Format of Paper
The paper should include: Title, author(s) name(s) (surname in full) and address (es), an abstract not exceeding 250 words, a few key words and the main paper. The main paper should have an Introduction, Materials and Methods, Results and Discussion, Tables and Figures, Plates, Conclusion, Acknowledgment, References. If the paper has more than one author, the first on the list is the Correspondence author.

References
The reference style should be APA format.

Review Process
Articles for publication will be peer reviewed by 2 or 3 reviewers to ensure accuracy. Guided by the reviewer's comment on a paper, the decision of the Board is final.
Copyright
Upon acceptance of a paper by the journal, the author(s) have automatically transferred copyright of the paper to International Standard Research Publishing. The transfer will ensure widest possible dissemination of information.

Charges
Manuscript must be submitted along with a processing fee. Upon acceptance of a paper for publication, the corresponding author must submit the corrected paper and pay a publication fee of $200 (USD) only. Corresponding authors shall receive one copy of Journal and could also download articles from the Journal's website.

Publication Ethics and Publication Malpractice Statement
Publication decisions: The editor is responsible for deciding which of the articles submitted to the journal should be published. The editor may be guided by the policies of the journal's editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editor may confer with other editors or reviewers in making this decisions.

Confidentiality: The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Adelante Ajusin University, Akungba – Akoko, Nigeria

Abstract

Studies have argued for improved understanding of local knowledge of climate, its variability and effect, so that adaptation and resilience can be improved. This study examined the local understanding of climatic conditions for agricultural practices and farmers' adaptation strategies in the area. The evaluation was based on discussion with a focus – group, consisting of a village head and local people in each of six purposively (mainly rural and agrarian) selected communities in Akinyele local government area of Oyo State, Nigeria. Participants were mainly male (90%), aged over 40 years (80%) and have lived in their communities for over 30 years. Dominant crops were cocoa and plantain, intercropped with few crops including maize, cassava and vegetables, in a mixed cropping system. Over 70% do not have former education beyond primary or elementary level. Adaptation approaches included change in types of crop grown, change in planting period, increasing farm sizes, among others. The study concluded that although the local people demonstrated adequate knowledge of variability in climate, they lacked sufficient knowledge about extreme conditions, whose actions are short-lived but with devastating effects on humans and livelihoods. Improved support for capacity building for adaptation of the people and their livelihood is recommended.

An Examination of Climate Change Mitigation Policies in Nigeria 1999-2021

Dr. Adoyi Matthew Omale
Department of International Relations and Diplomacy
Baze University, Abuja, Nigeria

Abstract

Climate change has been on the front burner of national and international discourse for decades, this is because of its devastating impact on the socio-economic development of communities across the globe. This paper examines climate change mitigating programmes and policies in Nigeria from 1999-2021. It addresses the challenges confronting implementation of strategic policies at all level of governance in Nigeria. It argues that corruption and poor programme implementation has continued to hamper efforts to tackle the menace of climate change in Nigeria despite enormous resources expended on the programmes. The paper identified some of the challenges of tackling the impact of climate change to include poor funding, illiteracy and lack of public awareness, inadequate legislation and political will on the part of government at all levels amongst others. The paper used the system theory as propounded by David Easton to explain the government response to the issue of climate change in Nigeria; it also used quantitative research methods in carrying out its analysis by gathering data from secondary sources. The paper concludes that developing countries are grappling with the menace of climate change basically because they are doing little to combat the problem and policies put in place are not yielding the desired results. The paper recommends policy harmonization between the various tiers of government in the country, effective utilization of donor funds, eradication of corruption in the management of the programmes and strict adherence to the various multilateral climate change protocols in place.

Assessment of Teacher's Use of Action-Oriented Techniques and Strategies for Teaching Social Studies Education in Lower Basic Education Level Schools in Ogun State

Dr. Anderson Paingha Sele & Amos Adekunle Adediran PhD

Niger Delta University, Wilberforce Island, Bayelsa State
Department of Social Studies, Federal College of Education, Abeokuta, Ogun State

Abstract

The study sought to assess the teacher's use of action-oriented techniques and strategies for teaching social studies education in lower basic education level schools in Ogun State. A survey research design which involves the use of questionnaires to acquire necessary data for the research work. Random sampling technique was used to select 10 lower basic teachers in Odeda Local Government, Ogun State, 20 teachers were randomly selected from each of the chosen school to make a total of 150 as sample for study. Two research questions were raised for the study. The data collected were analyzed with the use of simple percentage, mean and standard deviation statistical tool. The result revealed that teaching to elicit curiosity, interest, attention and scientific attitudes require the use of action-oriented techniques that help to bring about well-rounded learners and quality education. The use of such approaches will lead to learners making discoveries and inventions that will benefit them and society. It was therefore recommended that Social Studies teachers should be encouraged to use action-oriented methods through the provision of needed materials and resources and also, government and education managers should organize on-the-job training, seminars, workshops, symposia and conferences at intervals for Social Studies teachers to update their knowledge on action-oriented teaching-learning methods.

Conflict of Land Use Types Over Geomorphological Space of Anambra State, Southeastern Nigeria: The Analyses and Predictions

Romanus Udegbunam Ayadiuno, Dominic Chukwuka Ndulue, Arinze Tagbo Mozie & Cosmos Chinemelum Ndichie

Department of Geography, University of Nigeria Nsukka, Enugu State, Nigeria

Abstract

This paper looks at how geomorphological constraints have led to the scarcity of lands in most urban and newly urbanizing areas by reducing land that would have been available for urban expansion. The study area is Anambra state; the data used for this study include primary and secondary data. Mixed method approach was applied in the analysis and presentation of data, and ArcGIS 10.2 GIS software was also used for the processing of the satellite imageries to determine the rate of land use cover change in the state. Conclusively, People for long are not living in the active flood plains of Idemili-Niger area and other agriculturally endowed lands, but presently, due to increase in population and pressure on land, people have now started buying and sand filling land in these areas without considering the danger their actions may cause if there is soil failure. Mixed land use type is visibly observed, especially urban related land use like commercial and other socio-cultural land uses. The land use cover change analysis shows that there is a reduction from 53.26% to 28.75% of vegetated land; reduction from 26.48% to 25.02% of disturbed vegetation and a whooping increase of 20.51% from 4.69% respectively, within a period of thirty (30) years. Presently, Anambra state is almost attaining equilibrium in all land use types in the State and if nothing is done to checkmate the trend, there may no longer be available space for vegetation or farm land in the State in the next thirty (30) years.

Educational Interventions for Remodeling and Sustainability of Homeless People in Nigeria

1Ogundele, Michael Olarewaju (PhD) & 
2Bodang, Rotkangmwa Juliana (PhD)  

Faculty of Education  
University of Jos

Abstract

The article aimed at examining the educational interventions for sustainability and remodeling of the homeless people in Nigeria. The homeless people living situations had become a concerned issues among the among well meaning Nigerians. The issues of concerned for the homeless people are insecurity of life, poverty, unemployment, inaccessibility to quality education, hungers, sexual harassment, hirekillers’, exposure to climate change and high rate of unwanted teenage pregnancy. However, the need to provide the homeless people to better life and contribute towards sustainable national development has beena focus of this paper. The paper therefore, discuss the educational interventions that can be adopted towards remodelling of the homeless people for their national sustainability and development. The educational interventions examined are counseling, welfare, entrepreneurship political and security education programme that will aid remodeling exercises for the homeless people in Nigeria. It was concluded that the educational intervention will aid effective remodeling of the homeless people. It was however suggested that the remodeling and sustainability of homeless people is the responsibility of stakeholders in education three tiers of government, philanthropists and 8 meaning Nigerians.

Assessment of Pre-Service Teachers Knowledge and Attitudes Towards Circular Economy in Southwest, Nigeria

Tolulope. V. Gbadamosi PhD
Department of Arts and Social Sciences Education, Faculty of Education, University of Ibadan, Ibadan

Abstract

Achieving a sustainable environment remains the major challenge for the African continent. Nigeria as a nation is struggling to achieve a sustainable environment as a result of over-dependence on natural resources which has led to the destruction of the ecosystem. While depending on nature, is not bad on its own, the process of production and consumption of the materials has reaching its limits, giving rise to a system of production that encourages the responsible use of natural resources at our disposal. Achieving a circular economy requires new knowledge, practices, skills, and attitudes. It is important to note that education is the potent way to achieve sustainable development through a circular economy. Meanwhile, no education can rise above the level of her teacher. Hence the need to assess the level of preparedness of teachers in training about circular economy. The study, therefore, investigates preservice teachers' knowledge and attitudes toward the circular economy in Southwest, Nigeria. Two validated instruments will be used to collect data for the study. Quantitative data will be analysed using descriptive and inferential statistics while the thematic approach will be used for qualitative data. From the findings, recommendations will be made.

Abstract

This study examined the relationship between funding and disaster management methods of the Federal Universities in North Central in era of COVID-19 Pandemic in Nigeria. A descriptive survey research design was adopted for the study. The population of the respondents are Bursar, Registrars, directors of works, physical facilities, chief security officers, portals, medical sciences, deans of facilities, students affairs and deputy vice chancellor administration which totaled 560 respondents, out of which 300 respondents were selected using stratified random sampling technique. Four research questions were raised and two hypotheses were formulated to guide the study. The instruments for the study were self designed instrument tagged Disaster Management Methods Questionnaire (DMMQ) and Disaster Management Funding Checklist (DMFC). The instrument were validated by the experts in education and disaster management. Reliability index was 0.77 which was determined by using split-half reliability method. The research questions were answered using Mean Score and Standard deviation at +2.5 benchmarks, while the hypotheses were tested using Pearson product moment correlation statistics. The findings however revealed that the available financial budget is low to cater for both the capital and recurrent expenditure patterns in Federal universities in era of COVID -19 Pandemic in Nigeria. However the methods of disaster management suffered a lot but it was efficiently managed by the institutional management. It is however recommended that the disaster management of the Nigerian Universities should be given an adequate priority when preparing the yearly budgetary allocation of the universities in era of COVID-19 Pandemic in Nigeria.

Religious Education Curriculum as Remedy to the Immoral Dressing Among Students of Higher Institutions

Dr. Dorgu T. E.
Faculty of Education, Niger Delta University,
Wilberforce Island, Bayelsa State

Abstract

This study examined religious education curriculum as panacea to the immoral dressing among students of Emmanuel Alayande College of education, Oyo, Oyo State. Nigeria. The study adopted the descriptive survey research design. Population comprised of all Christian religious studies students of Emmanuel Alayande College of Education, Oyo, Oyo State. Simple random sampling technique was used for this study. One hundred (100) Christian religious studies students were used. Questionnaire was used for data collection. Simple percentage was used to analysis the data. The results of this study revealed that some of the forms of indecent dressing are common among students of Emmanuel Alayande College of Education, It was also revealed that religious education curriculum has moral values that can transform student’s character and behavior for better. Recommendations are therefore made as follows: School authority should promulgate law that will make students to desist from naked dressing. Also dress code should be introduced to check mate unwanted dressing among female students.

Keywords: Remedy, Dressing, Curb, Immoral, Curriculum
