ABSTRACTS PROCEEDINGS & INDUCTION

THEME: NIGERIAN POLITICAL PROCESS, SECURITY & ECONOMIC DEVELOPMENT: ISSUES, CHALLENGES AND PROSPECTS FOR 2023

21ST - 22ND JULY, 2022

UNIVERSITY OF ABUJA - NIGERIA
FIRST ASSURED INTERNATIONAL UNIVERSITY
...creative learning & excellence.

VISION 03:20:25
信仰总是找到一种方式！

... exceeding great possibilities
www.internationalpolicybrief.org
Our Vision

To be the world’s leading research & publishing Institute on policy review and development strategies.

Our Mission

Through independent, collaborative and institutional research, review existing development policies especially in developing economies of the world, research into evidence-based strategies to advance new measures for achieving sustainable development.

Our Commitment

“Our goal is for the best
We are not satisfied with less than the best
Excellence is our ultimate pursuit
With consistency, hardwork & determination we will attain our noblest goal; Excellence!
We are more Assured that God is on Our side.”

...exceeding great possibilities
Welcome!

International School of Advanced Research Study

We are glad to introduce you to our Online Professional Certificate and Degree courses on “Research Methodology and Statistical Techniques” in affiliation with International Asian Universities and European Research Organisations. We believe you are the right person for this course. It is 100% online and flexible.

Earn a Professional Certificate & Degree in

RESEARCH METHODOLOGY & STATISTICAL TECHNIQUES

International School of Advanced Research Study (ISARS) partners with institutions to train and certify researchers on various themes in Research Methodology and Statistical Techniques. We wish to partner with your University by organizing research training workshop for graduate students and academic staff. A detailed proposal will be sent to you at your request. Send an email or call the Ag Registrar for inquiries.

THEME

OBJECTIVE
The two-days conference is geared towards accessing the challenges and prospects of the 2023 elections. As the Nigerian state prepares for her transition by electing new leaders, there is a need to engage the academia, government, business, the civil society and Nigerians in diaspora to discuss issues of political stability, security, and agenda for economic development during and after the 2023 national elections.

DATE: Thursday 21st - Friday 22nd July, 2022
TIME: 10:00 am

CONFERENCE LOC:
Prof. Yusufu Zoaka
Department of Political Science
University of Abuja, Nigeria (+2348033010927)

About Us
The International Institute for Policy Review and Development Strategies (IIPRDS), Nigeria is a member of First Assured Brilliant Intl Limited, incorporated under the Companies & Allied Matters ACT of the Federal Republic of Nigeria. The Institute is a non-partisan organization, independent of government and other bodies. Since incorporated in 2013, IIPRDS has made significant contributions in quality research and international standard publications.

Vision/Mission
To be the world's leading research and publishing Institute on policy review and development strategies. Through independent, collaborative and institutional research, review existing development policies especially in developing economies of the world, research into evidence-based strategies to advance new measures for achieving sustainable development.

Research Focus & Publication
IIPRDS has organized several international research conferences and published proceedings in International multi-disciplinary journals indexed and domiciled in reputable Universities. Special issues are published in the African Development Charter series; a strategic economic and policy blueprint for Africa development.

IIPRDS international journals are published and indexed in 3 directories;
1. Science Publishing Corporation (SPC) Germany
2. International Scientific Research Consortium (ISRC) United Kingdom and
3. International Journals of Advanced Scientific Research (IJASR), Nigeria, Nairobi, Ghana and Tanzania. IJASR are online international open access peer review scholarly journals. Click this links for published Journals:
   http://www.internationalpolicybrief.org/journals

Exchange of Idea Initiative (EII)
The Institute currently operates an Exchange of Idea Initiative (EII) with other International Research Organizations and Libraries to enhance wider researcher of its journals. With this initiative, Academic Journals are published in various Countries by reputable publishers and research organizations not minding where the conference is held. This dynamism has diversified and improved the quality of the Institute Journals, enhanced International acceptance by indexing research agencies, built confidence in conferees and enhanced their disciplinary relevance.

We conduct our work with strict independence, objectivity, and non-partisanship.
See website: http://www.internationalpolicybrief.org
MEMBER

UNITED NATIONS-AFRICAN
International Partnership for Sustainable Development Goals

The United Nations-African International Partnership for Sustainable Development Goals (UN-African IPDS) is a strategic research and policy framework of the International Institute for Policy Review and Development Strategies (IIPRDS) with support from UNDP, International Research Institutions and Universities. The strategic framework is designed to help Countries achieve the objectives of sustainable development goals through research interaction, policy determination and implementation framework.

Membership offers opportunities for research training, provision of technical support for International Research Projects in Africa, field study reporting, and publication of economic reviews in the African Development Charter Series.

Given this day 22nd February, 2019 at the University of Dar Es Salaam, Tanzania

Congratulations!

MEMBER

EXPERT TECHNICAL PANEL
FOR ASIAN-AFRICA’S POLICY REVIEW,
INVESTMENT & DEVELOPMENT PROFILE

Led by International Institute for Policy Review and Development Strategies (IIPRDS), International Universities and Industrial Partnership, the Panel examines policy framework and investment initiatives design to achieve goals of sustainable Development in Developing Economies of Asia and Africa. Policy outcome aims at strengthening institutions of development administration.

Dated this day 5th November, 2019
University of Ghana, Accra

proceedings | p.vi
The Chairman African Research Council for Sustainable Development will Cap and say:

The President/Director, International Institute for Policy Review and Development Strategies will say,
“By the authorities of the Council of Directors, First Assured Brilliant International Ltd (incorporated under the Companies & Allied Matters ACT of the Federal Republic of Nigeria), of which IIPRDS is an Institutional Research and Policy Directorate; Professional Research Council, International Directorates of Policy and Research of IIPRDS and Academic Board, I admit you as Professional Members and Associates of the International Institute for Policy Review and Development Strategies with all the rights and privileges attached thereto”.

The Chairman, African Research Council for Sustainable Development will read out the names of the inductees. As each inductee is called, he/she will move to the platform to receive a Certificate and Plague from the President/ Director of IIPRDS.

Timeline for Manuscript Corrections and Journal Publication

The timeline for manuscript assessment and publication is as outlined below:

1. The Plenary/Technical session is compulsory for all conferee. You are advised to note the comments pointed out by the Chairman of the Technical Session and other members of the plenary group. This will help you effects corrections as expected.

2. Corrections of manuscript(s) (full papers) must be effected and submitted within 2 weeks after the conference. All submission must be made to: iiprdsprojects@gmail.com

3. The Conference Professional Peer Review Editorial Panel (CPPREP) will meet 2 weeks after the league conference to review papers. This usually takes one week, after which the papers are forwarded to Google scholar International Standard Peer Review Research Council for professional and disciplinary blind peer review and plagiarism check. Usually this takes about 3 weeks.

4. Letter of Papers Acceptance and Journal Publication will be issued to author(s) on the 6th week after the conference. Acceptance will be in three forms:
   a. After peer review, papers with less than 50% accuracy level will be rejected. Author(s) will be required to re-write the paper based on observations.
   b. Secondly, papers with 51 – 80% accuracy level will be accepted for publication, but with minor corrections effected by the institute.
   c. Finally, papers with 81 – 95% accuracy level will be accepted for publication with minor corrections effected by the institute.

5. On acceptance of paper for publication, author(s) will be required to make PAYMENT for paper publication/ pagination (hard print and online) and courier. Payment must be done within 2 weeks of notification of acceptance. Authors will receive their published journals within 10 weeks after the conference.

6. Accepted papers will be published in International Scientific Disciplinary Research Journals with high level Impact Factor (in hard print and e-version). Published journals will be indexed in Google scholar and other online research directory.
Guidelines for Manuscript Submission

Important Notice
Submitting your manuscript for assessment and publication in any of the International Journal Series means that your work has not been published elsewhere in any other journal, book or in a book chapter, be it printed online (except in the form of an abstract or an academic thesis). The editor(s) of the journal(s) have the right to edit or to alter all contribution, but authors of the submitted work will receive proof before the publication of their work.

Submission of Manuscripts
Manuscript should be submitted to the Editor in Chief, typed in English with Times New Roman font size 12, doubled space with 1” margin at all sides of A4 paper. Manuscripts should not exceed 14 pages. Articles for publication should be sent to the Editor, International Standard Research Publishing through the journal.

E-mail: iiprdsprojects@gmail.com

Manuscript should be legibly written with clear symbols, drawings, photographs, chemical structures to ensure clarity and easy reproduction. Authors are urged to pay attentions to tables, figures and references which should be done in the correct format and appropriately cited in the main text.

Format of Paper
The paper should include: Title, author(s) name(s) (surname in full) and address (es), an abstract not exceeding 250 words, a few key words and the main paper. The main paper should have an Introduction, Materials and Methods, Results and Discussion, Tables and Figures, Plates, Conclusion, Acknowledgment, References. If the paper has more than one author, the first on the list is the Correspondence author.

References
The reference style should be APA format.

Review Process
Articles for publication will be peer reviewed by 2 or 3 reviewers to ensure accuracy. Guided by the reviewer's comment on a paper, the decision of the Board is final.
Copyright
Upon acceptance of a paper by the journal, the author(s) have automatically transferred copyright of the paper to International Standard Research Publishing. The transfer will ensure widest possible dissemination of information.

Charges
Manuscript must be submitted along with a processing fee. Upon acceptance of a paper for publication, the corresponding author must submit the corrected paper and pay a publication fee of $200 (USD) only. Corresponding authors shall receive one copy of Journal and could also download articles from the Journal's website.

Publication Ethics and Publication Malpractice Statement
Publication decisions: The editor is responsible for deciding which of the articles submitted to the journal should be published. The editor may be guided by the policies of the journal's editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editor may confer with other editors or reviewers in making this decisions.

Confidentiality: The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Institutional website: www.internationalpolicybrief.org

Military, Policing and Security During 2023 General Elections in Nigeria: Challenges and Prospects

Dr. Joseph Adeshola Adekeye
Department of Public Administration
Federal University Lokoja

Abstract

One of the fundamental determinants of free and fair elections is the security of life and properties before, during and after the electioneering process. Despite the fact that a large number of Military and Paramilitary personnel are mobilized for the conduct of Elections, cases of violence, snatching of ballot boxes, loss of lives and properties are on the increase in most elections in Nigeria. In light of the above, this paper examines the challenges and prospects of 2023 general elections with regards to the security of life and properties through the instrumentalities of the Military and other security agencies. The main objective of the paper is to assess the implications of using the Military and other security agencies on national security in 2023 general elections. Methodologically, the paper adopts a qualitative approach for the purpose of obtaining the required materials through the contents analysis of documents from National Independent Electoral Commission, Election Independent Observers reports, observations from the participating political parties and the reports of Transparency International. The research findings revealed that the major challenges envisaged from 2023 general elections is the fact that the security of life and properties of citizens may not be guaranteed if the security agencies carry out assigned responsibilities in an unprofessional and partisan manner. The study therefore recommended that the security agencies should carry out assigned duties and responsibilities in a professional and non-partisan way in order to guarantee the security of life and properties of citizens before, during and after the 2023 general elections.

Is Fiscal Decentralisation Good for Economic Development? New Evidence from Nigeria

Silas Idoko Abu & Ekeyi Sunday

1Department of Economics, Prince Abubakar Audu University, Anyigba, Kogi State - Nigeria
2School of General Studies, Federal Polytechnic Kaltungo, Gombe State - Nigeria

Abstract

There is a widespread belief that fiscal decentralization is an effective tool for increasing the efficiency of public expenditures. In this regard, this study examines the Nigerian environment for the period spanning 1970 – 2020 with the objective of ascertaining whether fiscal decentralisation would stimulate economic development in the economy or otherwise. Using qualitative and descriptive analytical methods, the study found that the theoretical expectation that decentralization would improve the performance of a nation, and in-turn bring forth economic development seem not to be the Nigerian experience. Though Nigeria may be termed “a bit decentralized” in recent times because of its associated democratic practice, such decentralisation is observable only in terms of the devolution of expenditure powers and responsibilities. Issues on income generation and revenue earnings are still very much controlled and resident with the central government as most states and (especially) local governments cannot boast of genuine revenue sources and income generation autonomy. Consequently, it will suffice to posit that Nigeria cannot be termed as a fully decentralised economy yet, and such infant level of decentralisation cannot support and stimulate economic development appropriately and accordingly. The findings in this study indicate that revenue decentralization needs to exceed an indicative threshold to improve service delivery in Nigeria. If this can be achieved, revenue decentralization would exert positive impacts across all country groups. Furthermore, corruption needs to be tackled to prevent misuse of public resources, and capacity needs to be strengthened at the local government levels. In the absence of these conditions, fiscal decentralization (if achieved) can worsen public service delivery, and in turn retard economic development.

Keywords: Fiscal Decentralisation, Fiscal Federalism, Revenue, Expenditure, Economic Development
Boko Haram Insurgency and it's Paradigmatic Shift in Terror: The Nigerian Military as an Endangered Specie

Adie Hilary Adiege & Okon Bassey Bassey

Department of Public Administration, University of Calabar, Cross River State - Nigeria.

Department of Political Science, University of Calabar, Cross River State - Nigeria.

Abstract

Security issues are multidimensional in nature. Thus, issues like arm robbery, kidnapping, rape, human trafficking, cult-related killings, militancy, piracy and other criminal acts are issues of grave threats to human existence. Little wonder the sacredness of the ethical reasoning, thus: the sole responsibility of any government in either developed or developing country, is the protection of lives and properties, as enshrined in section 14(2) of the 1999 Constitution of the Federal Republic of Nigeria. In achieving this responsibility, the Nigerian government established the various military and Security agencies (army, navy, airforce, police, civil defence, DSS, immigration, customs, etc.) to aid in the protection of lives and properties, of its citizens, enhancing their welfare, suppress internal insurrections, protect the territorial integrity against external threat and violation of sovereignty, etc. The Boko Haram Insurgency, remains one of the complex security exigencies that engulfs the Nigerian state in a deadly proportion for over 10 years. The continuous killings, maiming, kidnapping, bombing of innocent civilians in Nigeria, mostly in the north-western, north-eastern and north Central part is unbearable. The problem becomes worrisome, as the group has shifted its terror targets to the Nigerian military and Security agencies. This have manifested in ambushing, attack at military bases and installations, checkpoints, carting away their weapons, abducting them, etc. this shows the level of bravery and fearlessness of Boko Haram, to a point never imagined as they most times engages the Nigerian military in pitch battles, overwhelming and annihilating them with more sophisticated weapons beyond the reach of Nigerian military. It is upon this backdrop, the paper sets to unravel, the factors that could be responsible for such weakness in combat and counter Insurgency warfare of the Nigerian military. In order to unravel such anomalies, the study asked certain questions such as: to what extent does corruption cripples the counter insurgency efforts? To what extent does poor intelligence and sabotage weaken the Nigerian military and makes them vulnerable and exposed to Boko Haram attack? The paper methodologically proceeds with content analysis as data were gotten from mainly secondary sources (textbooks, journal publications, newspapers, magazine, etc), while the social contract theory and needs theory was explored. The study discovered that boko Haram Insurgency is politically motivated, with a religious undertone made worst by bad leadership and political corruption. Hence recommends amongst other things: sincerely probing of defence spending relating to counter insurgency funds, removal of service chiefs that are not sincere, probing of high-ranking military officers.

Defense Expenditure and the Fight Against Insurgency in Nigeria North East Region

Ameji, Negedu Enemona, Solomon, Urah Peter & Ekeyii Sunday
1 Economics Department, Federal University, Lokoja
2 Economics Department, Kogi State University
3 School of General Studies, Federal Polytechnic, Kaltungo, Gombe State

Abstract

The fight against insurgency in Nigeria's North East region has enjoyed substantial funding in recent time. This study examines the impact of government defense spending on insurgency in the country. Using monthly casualty figures from the Nigeria Security Tracker, it examines the impact of public defense spending on the number of incidents by month and total deaths of civilians and state actors between 2015 and 2020. Quantitative analysis was used as the study's estimation method. It carried out its empirical analysis using Poisson regression. According to the result of the regression analysis, government defense spending has reduced insurgency-related casualties by about 89 percent over the study period. Despite the gains made possible by the government's budgetary commitment to the fight, much work remains to be done in the region to put an end to insurgency. The study recommends, among other things, that funds be allocated to reconstruction, development, and providing gainful employment for the region's growing number of young people in order to deter them from taking up arms.

Monetization of Politics: Delegates as a Commercialized Political Tool and a Flawed Process of Candidate/Leadership Selection against 2023 Election in Nigeria's Democratic Fourth Republic

Okon Bassey Bassey
Department of Political Science,
University of Calabar Cross River State Nigeria

Abstract

One of the pernicious issues in Nigerian politics since the attainment of Democracy in 29th May, 1999, apart from rigging, assassination, thuggery, ethnicism, etc. is that of monetization of politics. This has been one continuous undemocratic strategy employed by criminalistic political office seekers to grab power in the polity. The level of poverty, unquestionable loyalty, illiteracy, hunger, party interest etc. which has unfortunately placed the young ones and majority of the citizens in a “beggar position”. Thus there is no gainsaying the fact that, such impoverished masses gladly receives the little crumbs that falls from the table of political cum economic rapist during electioneering period, breeding the process of monetization of politics(from purchasing of nomination forms, campaign, electioneering, crowd renting to vote buying ,etc.). The introduction of delegates system has made matters worse as delegates becomes a quick political enterprise of commercialization of votes during primaries. This has been the tenets of the 2022 primaries in preparation for 2023 Elections. Aspirants from the All-Progressive Congress-APC and the People's Democratic Party-PDP respectively dole out cash in both local and foreign currencies to delegates, to secure primary victory. Thus competency, visionary leadership, accountability, patriotism is brutally and blatantly sacrificed at the altar of vote buying. It is upon this backdrop, the paper sets to unravel the extent at which, the delegate system has been bastardized by money politics and its effect in leadership selection. the paper is content analysis base, as data were gotten from mainly secondary sources-textbooks, magazines, internet materials, journal publications etc. the investment theory of party was adopted. the study discovered that, the delegate system whereby a few decide the fate many in a polity isn't palatable for inclusive democracy, hence it's abolishment. Also, money politics be legally prohibited by law.

Empirical Analysis of the Impact of Political Stability and Institutional Quality on Economic Growth: Evidence from Nigeria

Musa Munkaila, Abubakar Sadiq Salisu, Abdullahi Mohammed, Iliya Elisha & Mohammed Haruna Ashaka

Department of General Studies (Economics Unit), Department of Business Administration and Management, Department of General Studies (Glaps Unit), Gombe State Polytechnic Bajoga

Abstract

This study seeks to empirically investigate the impacts of political stability and institutional quality on economic growth in Nigeria using annual time series spanning 2000 to 2020. The research employs Autoregressive Distributed Lag model (Bound test) and error correction technique to analyses the relationship. The result of the ARDL bound test revealed the presence of long relationship where both the political stability and institutional quality were found to have positive and statistically significant impacts on economic growth in the long run. The result of the associated error correction term was negative, less than one and statistically significant confirming the existence of long run relationship among the variables used in the study. Its is therefore recommended that authorities in Nigeria should work toward further stabilizing the polity and strengthening its institutions for more sustainable growth and development of the economy.

Keywords: Political stability, Institutional Quality, ARDL, Nigeria, Economic growth.
The Impact of Education Expenditure on Economic Growth: A Study of West African Monetary Zone Countries

1Musa Munkaila, 2Abubakar Sadiq Salisu, 3Abdullahi Bilyaminu, 4Abdullahi Mohammed Umar & 5Umar Muhammad
1, 2 & 3Department of General Studies (Economics Unit), 4Department of Business Administration and Management, 5Department of Mathematics and Statistics, Gombe State Polytechnic, Bajoga

Abstract

There has been no much attention focused, empirically on the impact of education expenditure on economic growth of west African monetary zone member countries. Therefore, this paper examines the impact of education expenditure on economic growth: A case of west African Monetary Zone Countries from the periods of 2004 to 2018. The variables used are Gross Domestic mm, Product Growth rate, Education expenditure as a percentage of Government expenditure, Gross Fixed Capital Formation a percent of GDP and Regulatory quality. The data were sourced from the World Bank Development Indicator (WDI) and World Governance Indicator (2020). Variables were estimated using Autoregressive Distributed Lag (ARDL) Pool mean Group (PMG) with Correlation Matrix, cross sectional dependence test and Panel Unit root test. The result of the study reveals that education expenditure has positive and statistically significant impact on economic growth in the Long run while Capital Formation and Regulatory quality are not statistically significant however, in the short run all the variables are statistically insignificant. Therefore, the paper recommended that West African Monetary Zone Member Countries should increase their budgetary allocation in line with the United Nations Educational, Scientific and Cultural Organisations (UNESCO) minimum benchmark of 26% education share of total budgetary allocation for developing countries.

Improved Quality Secondary Education: A Sine Qua None for Nigeria's National Security and Sustainable Development

Jibril Babayo Sulaiman & Umar Abubakar

Department of Sociology, Faculty of Social Sciences, Bauchi State University, Gadau, Nigeria

Abstract

This study contributes towards using an improved secondary education in solving the challenges of education, security and sustainable development in Nigeria. Evidences have indicated that leadership failure characterized by diminishing standard of educational and socio-politico-economic sectors in Nigeria due to lack of success in proper implementation of the policies. The sustainability of a nation’s national development depends on the level of literacy among its citizens. An improved educational system can usher in an edifice upon which a workable developmental platform is built. The researchers used scholarly literatures- textbooks, national dailies, articles, among other sources to discuss the relevance of overhauling the quality of secondary education for improving national security and sustainable development in Nigeria. The findings of the study indicated that other challenges such as corruption, insufficient qualified teachers and lack of political will also affect the quality of education and national security. The researchers recommended that the curriculum should include strategies for peaceful coexistence and the United Nations' recommended percentage allocation for education be implemented by the Nigerian government. Only qualified teachers should be employed; while the ones already employed should be trained and retrained by way of empowerment. Further study should include an empirical research to develop a model for a functional educational system.

The 'Sak' Syndrome, Buhari Populism and Misrepresentation in Nigerian 2015 and 2019 General Elections

Babayo Sule
Department of Political Science,
Federal University Kashere, Gombe State Nigeria

Abstract

Populism politics in the 21st century is believed to have been swaying and influencing voters to vote in a particular direction. Global populist like Trump, Chavez, Erdogan, Putin and Buhari are believed to have established cult-like followership that leveraged their path to electoral victory. Unlike other societies where Populism is active, in Nigeria it has been a different version where the President Buhari-led populist movement from the inception of his partisan politics in 2003 to 2019 channelled a voting pattern syndrome of 'SAK'. This study examined critically how Buhari's 'SAK' syndrome led to the emergence of incompetent and incapacitated elected leaders at both national and state levels and the impacts of that voting style on misrepresentation of the electorates in decision and policymaking as well as campaign promises delivery. The study used a qualitative particularistic case study where data were assembled through an in-depth personal interview with some selected relevant informants. The data obtained together with the existing body of literature on the subject matter were discussed, analysed, discussed and interpreted using a thematic analytical interpretation. The study discovered that the concept of Populism politics is obtainable in Nigeria under the Buhari-led political prowess but the state is not considered as a good example of where populist politics is practised. It is also unveiled from the study that the populist movement of the Buhari politics known as 'SAK' led to the emergence of weak and incompetent elected officers locally and nationally who lacked any merit or credibility to win any election but for the Populism and this has the implications of misrepresentation and misgovernance. The study, therefore, suggested among many other recommendations that the electorates, in particular, should desist from the 'SAK' pattern of voting and identified individually at all levels who deserves better to lead to avoid the repeat of the political miscalculation by the electorates.

Economic Impact of Terrorism on Nigeria: An Empirical Evidence from North-Central States

Ajidani S. Moses (PhD) & Hauwa V. Ibrahim (PhD)

Department of Economics
Nasarawa State University, Keffi.

Abstract

This study examined the economic impact of terrorism across states in North-central zone of Nigeria for the period 2009–2022. Following a panel data regression analysis, spatial variations in the relationships are examined using geographically weighted regression (GWR) to obtain locally different parameter estimates. A GWR approach allows the modeling of relationships that vary over space by introducing distance-based weights to provide parameter estimates for each variable and each geographical location. The pooled OLS; fixed effects and random effects models were estimated with macroeconomic variables (including economic growth, foreign direct investment, agricultural output, tourism, unemployment, inflation, and private investment) as the dependent variables. Empirical evidence indicates that while terrorism has positive effect on unemployment (UNE), and inflation (INF), it has negative effect on gross domestic product (GDP), foreign direct investment (FDI), agricultural output (AGO), private investment (PRI) and tourism (TOU). The study recommends that systematic checks on Nigerian external borders on all people entering Nigeria-including Nigerian citizens – should be introduced. Governments of states in the North-Central zone, should as a matter of urgency and importance, promote dialogue and co-operation on counter-terrorism issues, in particular, through public-private partnerships between the states authorities and the private sector (business community, industry), as well as civil society and the media. The states should also strengthen national efforts to implement United Nations Security Council resolution 1540 (2004) on non-proliferation of weapons of mass destruction.

Insurgency and Socio-Economic Status of Households in Rural Areas of North Central Nigeria

Hauwa V. Ibrahim (PhD) & Ajidani S. Moses (PhD)

Department of Economics
Nasarawa State University, Keffi.

Abstract

This study examined the impact of insurgency on socio-economic status of households in rural areas of north central Nigeria between 2000 and 2021. The study adopted survey method to examine the effect of insurgency on socio-economic status of households in rural areas of north central Nigeria. Data collected for this study were from primary sources, and they were collected from respondents across seven (7) states in the north-central Nigeria (including the Federal Capital Territory). The sample for this study covered 2100 individuals drawn from 3 senatorial zones from each of the seven states. A multi-stage sampling method was used for this study. In the first stage, three senatorial zones were selected from each state through judgmental sampling. To this end, The Ordinary Least Square (OLS) regression method was used to determine the relationships between variables. Cramer's V method was also utilized to determine the statistical significance and provides information about the strength of the relationship between insurgency and socio-economic status of households in rural areas of north central Nigeria. The findings showed that all the indicators of insurgency (ethnic crises, socio-economic crises, and political crises) have negative impact on socio-economic status (health, education, economic activities/income generation, and other socio-economic status) of residents in the rural areas of north central Nigeria. Therefore, it is concluded that insurgency generally has negative impact on socio-economic status of households in rural areas of north central Nigeria. The study recommends that Governments of states in the North-central Nigeria should develop strategies to fight insurgency. To this end, governments must be proactive in dealing with security issues and threats, through modern methods of intelligence gathering, and sharing among security personnel, training, logistics, motivation, and deployment of advanced technology in managing challenges of insecurity in the zone.

Government Education and Security Expenditure, Human Capital Development and Real Economic Growth in Nigeria

Gwom, Ayuba Usman, Dr. Steve Azi Dabo & Paul Dakyap

Department of Economics, Federal University of Lafia, Nasarawa State
Department of General Studies, Plateau State Polytechnic Barkin Ladi

Abstract

The aim of this study was to examine the relationship between government education and security expenditure, human capital development and real economic growth in Nigeria using time series data covering 1999 to 2021. The study was guided expos-facto design. Two objectives and two hypotheses were formulated and tested. The study used government expenditure on education (GEE), Human development Index (HDI) and government expenditure on security (GES) as independent variables, while Real Domestic Product (rGDP) was used to proxy real economic growth considered the independent variable. The Error Correction Model was used to estimate the model based on the fact that the ADF unit root test revealed that all the variables had 1(1) order of integration. The residual tests revealed the absence of serial correlation and heteroscedasticity. Furthermore, the findings from the estimated model revealed that Government expenditure on education (GEE) and human development index (HDI) had significant negative effect on real Domestic Product in Nigeria, while government expenditure on security had significant positive effect on real Gross Domestic Product in Nigeria. The results also revealed a unidirectional granger causality running from HDI to real GDP. The study concluded that a negative relationship exists between government expenditure on education and human capital development on real economic growth in Nigeria, while a positive relationship exists between government expenditure on security and real economic growth in Nigeria. The study recommended among others that government should increase its expenditure on education and security and monitor their utilization closely and government should invest more on human development to enhance their impact of real economic growth in Nigeria.

Conflict Management Approaches to Forestalling Boko Haram Insurgency in North Central Nigeria

Isaac Peter Chingle, Mancha Jonathan Mary, Paul Dakyap, & Sunday M. Arigu

Department of General Studies, Plateau State Polytechnic, Barkin Ladi

Abstract

Since the emergence of the dreadful boko haram insurgency sect, the north eastern part of Nigeria has severely injured with bruises that may take a lifetime to heal. While the habitants and indigenous people of north-eastern states of Nigeria have been rendered helpless to the fate of these insurgents, the Federal Government of Nigeria through her armed forces have never failed to make promises on their capability to defeat these insurgents. Nevertheless, the battle between the armed forces and insurgency has been going on for several years in attempt to resolve the conflict which has severely affected the north-eastern region and Nigeria as a whole. This paper evaluates some of conflict management approaches that have been successful in Nigeria in attempt to adopt these approaches towards forestalling the menace of insurgency in the north east.

Impact of Material Handling in Chemical and Allied Industries

Oba Abimbola Aina-David PhD  
Department of Business Administration & Management,  
Moshood Abiola Polytechnic, Abeokuta

Abstract

The purpose of the study was to examine the appraisal of material management, a study of some selected Chemicals and Allied Industries in Lagos state. The specific objective of the study is to examine the contribution of store inspection towards resource utilisation and to ascertain the relationship between the effective management of materials and the level of productivity in an organisation. The study applied a descriptive research design. The target population of the study were the employees of the selected Chemicals and Allied industries. Data was collected by taking a census survey on the 100 respondents by the answering of questionnaires and 95 (nifty five) answered questionnaires were returned validly. It was notable that there existed a strong positive relationship between the independent variables and dependent variable. This implied that the variables were very significant, therefore needed to be considered in any effort to boost organisational productivity and resources utilisation. The findings analysed also showed that there is significant relationship between material handling, store inspection and resource utilisation. The study recommends that material supply should be optimum to avoid "stock out" while work in progress. Organisations should always take into knowledge the cost of production or price of raw materials before arriving at selling price.

Averting Economic and Financial Crimes in Deposit Money Banks: An Issue for Forensic Investigation Techniques

Onuigwe, Gladys Chiebonam, Nwonye Fidelia Ifeyinwa & Ekpe Mary Jane
Department of Accountancy
Federal Polytechnic Nasarawa, Nasarawa State

Abstract

Since external auditors may not have the necessary knowledge to be able to detect, prevent, or reduce fraud in corporate organization, it is now necessary to introduce and practice forensic accounting. The objective of this study is to examine how forensic investigation technology affect fraud detection and prevention in deposits money banks. The study population comprises of 1,201 employees of Zenith Bank Plc, First Bank plc, and GT Bank Plc. Out of which a sample of 300 were chosen and administered questionnaire. Taro Yamane was used to determine the sample size. Mean score rating method was used to analyse the data based on a 2.5 acceptance region format. To answer the research questions, chi-square was used to address the research hypothesis. The findings revealed that forensic audit services had enhanced the quality, dependability and transparency of financial reports and had a significant impact in exposing fraud in Nigeria depositing money banks. The study concluded and recommended that core banking activities like cash management, loan processing and forex transactions need to be carefully monitored and exposed to forensic accounting.

Keywords: Forensic Audit, Financial crime, Fraud detection, Audit services, Forensic investigation.
Governance, Institutions and Infrastructure Delivery for Inclusive Growth

1 Osifalujo, Bunmi Babatunde, 2 Omotilewa, Oluwatoyin Olufemi & 3 Adesola, Munir Adekunle
1 & 2 Department of Accountancy, School of Business and Management Studies
3 Department of Banking and Finance, School of Business and Management Studies
Moshood Abiola Polytechnic, Abeokuta, Nigeria

Abstract

Infrastructure development is critical to induce growth and address the broader development goals of a nation. However, the extent to which infrastructure can endear growth depends on the broader policy environment within which infrastructure system operates which is a function of good governance. Hence, this study assessed the importance of governance and institutions on the effectiveness and efficiency of infrastructure development in promoting growth in Nigeria. The study adopted descriptive survey research design. The study population was senior staff members of MDAs in Ogun state. Primary data were collected through structured questionnaire which reliability was validated using Crombach Alpha test which produced coefficient of 0.706. Data collected were analyzed using simple regression analysis. The result of hypothesis 1 revealed positive and significant relationship between governance and effectiveness of infrastructure development (F=0.772, p-value=0.045<0.005) while hypothesis 2 revealed positive and significant impact of governance on effectiveness of infrastructure development (F =0.537, p-value=0.035<0.05). The study concluded that good governance practices through capable and resourced institutions are essential for ensuring positive contribution of infrastructure development to economic, social and environmental development in Nigeria. The study recommended strict adherence of public sector institutions charge with infrastructure delivery with the applicable institutional framework guiding infrastructure planning, delivery and operations, and exercise of political accountability by government officials as a prerequisite for beneficial infrastructure investments.

Empirical Analysis of Firm Attributes' Effect on Stock Returns of Listed Consumer Goods Companies in Nigeria

Adigizey, John Dollay, PhD
Department of Business Administration
Nasarawa State University, Keffi, Nigeria

Abstract

The corporate world of finance is said to have high affinity on well-managed, firm's attributes for engendering its solid growth and popularity among investors and creating Blue-chip stocks notable for superior stock returns. This ex-post-facto study was set to analyze the effect of firm attributes on stock returns of listed consumer-goods companies in Nigeria, with specific focus on the combined effect of firm size, firm age and profitability. Using purposive sampling technique, a sample size of sixteen (16) firms out of the population of twenty-three (23) listed consumer goods firms on the Nigerian Exchange Group (NGX) as at 2020, was obtained, with the criterion that a firm's financial information covering the study period (2011-2020) was complete. Extracted secondary data came from the annual financial reports of the sampled companies, and analyzed using pooled OLS regression technique. The result output revealed that firm size and firm age had negative insignificant effect, while profitability had positive significant effect on stock returns of quoted consumer goods companies in Nigeria. It was thus concluded that firm attributes had effects on the stock returns of companies in the consumer goods sector. Recommendations are that firms should ensure assets are effectively managed to have healthy firm size that will impart profits and firm value and hence improved stock returns to investors.

Keywords: Consumer-goods, Firm size, Firm age, Profitability, Stock Returns, Pooled OLS regression
The Effect of Exchange Rate Volatility on the Performance of Deposit Money Bank in Nigeria

Vincent Akinsola Akinyemi, Emeka, Ogboada & Ismaila Bala Yakubu

Department of Banking and Finance
Kaduna Polytechnic, Kaduna State

Abstract

As a financial intermediary, deposits money banks are more exposed to the effect of exchange rate. Exchange rate can affect banks corporate performance both directly or indirectly. The direct effect is easy to identify and can be easily be managed. However, the indirect effect of exchange rate on the performance of deposits money banks is very subtle. Basically, it evolves from the impact of exchange rate volatility on the business of banks' customers (depositors) and the economy in general. Therefore, it must be noted that, having a concrete knowledge about the aggregate effect of exchange rate volatility on the profitability and size of banks (performance), serves as a very crucial tool towards to devising an appropriate coping strategy in finding long lasting solution to the problems exerted by the volatility. Thus, through an impulse response analysis, an examination methodology called cholesky one standard innovation, this study, has therefore examined the empirical effect and future dynamic interactions, of exchange volatility on the corporate performance of deposit money banks in Nigeria using a time serial data set of Nigeria global bank, as a sample focus over the period of 1986-2021. This impulse response function was generated from the estimated vector error correction model (VECM). Furthermore, this study tried to determine the level of exchange rate volatility in Nigeria using the generalized auto regression conditional heteroscedasticity (GARCH 1, 1) model. The empirical findings of this study suggest that exchange rate statistically significant negative impact on the banks profitability variables included as control variables in the vector auto regression (VAR) analysis, total deposits (TDPO) and gross domestic products (GDP) growth are found to have significant positive impact on bank profitability and bank size in Nigeria. This study recommends therefore, that bank managers and governing body should focus on the composition effect of exchange rate variation on deposit money banks' profitability and size and make sure to avail appropriate strategy to reduce it adverse effect on the profitability of their bank.

Modelling Peace Accounting on National Security and Development in Nigeria: An Empirical Analysis

Dr Abdulkadir Abubakar, Dr Wasiu Suleiman, & Dr Mahmoud Ibrahim

1Department of Accounting, Faculty of Management Sciences, 2Department of Business Administration, Faculty of Management Sciences, Bauchi State University, Gadau

Abstract

This paper examined the nexus between peace accounting and national security and development in Nigeria. The objective was to develop peace accounting model with national security and development. The cost of ensuring national security is very high, but measuring this cost has received little attention. One way of recording and ascertaining the financial resources expended on national security is by Peace Accounting. Peace Accounting is an innovative idea that is taking a firm root in Nigeria and the world over. Peace accounting deals with ascertaining and reporting the financial resources accompanying domestic violence such as insecurity, political violence, insurgency, militancy, economic predicament, corruption and all other costs associated with national security. Global Peace Index is the dependent variable while Expenditure on Internal Security, Gross Fixed Capital Formation Cost of Peace Keeping are the independents. Secondary data were obtained from the Central Bank of Nigeria Statistical Bulletin and the International Monetary Fund Cross Country Macroeconomic Statistics from 1999–2021. Multi-variate regression technique was utilized in analyzing the data and analysis performed by E-views. The study found that expenditure on internal security, cost of peace keeping and gross fixed capital formation are dynamics of peace accounting and statistically negatively significant. In view of the above findings, it is concluded that peace accounting is very important as mechanism of national security and development in Nigeria. It is therefore, recommended among others that Nigeria should develop peace accounting standards and should engage academic and professional accountants that can help develop peace accounting models in order to ascertain and measure the cost of peace. The government should develop strategies to reduce insecurity in order to enhance economic growth and sustainable development.

Billboard Advertising Effects on Consumers' Purchase Intent of Heineken in Onitsha Metropolis

Dr. Leo Atuchukwu Ohazulike & Chendo Nkoli Augustina
Department of Marketing, Faculty of Management Sciences
Chukwuemeka Odumegwu Ojukwu University, Igbaram Campus, Anambra State, Nigeria

Abstract

This study scrutinized on billboard advertising effects on consumers' purchase intent of Heineken in Onitsha metropolis. The problem statement was too many billboards being erected along the streets and roads of Onitsha metropolis. The specific objective was to ensure that billboard advertising possesses high visual impact among others. Research question was to what extent does billboard advertising possess high visual impact among others. Research hypothesis was there is no significant relationship between billboard advertising and high visual impact among others. Review of related literature had insight on conceptual review, theoretical framework and empirical review. Survey research design was adopted. Area of the study was Fegge Port Harcourt road, Onitsha where one of Nigeria Breweries Plc, manufacturing plant is situated. Population of the study was unknown. Sampling plan consists of sample design, sample unit, sample size, sample method and sample procedure. Data was presented and analyzed. Two point, Likert scale of questioning was applied. The study found out that billboard advertising stimulates passersby to make a purchase of Heineken Lager beer. The study concluded that billboard advertising is a very vital tool to create awareness and remind prospects that Heineken is a quality product. The study recommended that Advertising Practitioners Council of Nigeria (APCON) should remove all illegally erected billboards; among others.

Resolution and Management of Failed Microfinance Banks in Nigeria: The Role of Regulators

John Nma Aliu
Department of Banking and Finance
College of Business and Management Studies (CBMS)
Kaduna Polytechnic, Kaduna

Abstract

This paper examined the role of regulatory bodies in the Management of failed Microfinance Banks (MFB) in Nigeria. Using the ordinary least square multiple regression to measure and estimate the necessary models, the role of the regulatory bodies was the dependent variable. Resolution and Management of failed microfinance banks through liquidation activities, claims settlement, payment of insured deposits to depositors and payment of liquidation dividends to uninsured depositors constituted the independent variables. The regression results indicates that one of the regulators - the Nigeria Deposit Insurance Corporation actively plays significant role in protecting the depositors funds in Microfinance Banks. The empirical evidence suggests that Microfinance Banking development is positively linked to the role of regulatory bodies in Managing the failed MFBs in Nigeria. The study therefore, recommends the adaption of legal system that protect creditor's and depositor's rights in order to boost the confidence of Microfinance Banking public.

Keywords: Microfinance Bank, failed Banks, Resolution, Liquidation dividends.
The Need for Diaspora Voting in Nigeria Elections: An Assessment

Dr. B.M. Magaji  
School of Law,  
American University of Nigeria, Yola Nigeria

Abstract

Diaspora voting is not an alien concept in most advanced, and even more developing, democracies of the world. It is a response to the advancing worldwide democratization agenda, as well as massive economics, social and cultural globalization. Diaspora voting is currently practiced in 115 countries around the world, and indeed 28 African countries have made legal and logistical provisions in their electoral processes to ensure their citizens abroad have a say during elections. And this inclusion in the political and electoral process is perhaps even more important for Africans in the diaspora than any other group anywhere else. Remittances by Nigerian Living Abroad contribute massively to the GDP of the country. In 2013 alone a total of $21 billion was sent home, making Nigeria the fifth largest recipient of foreign remittances among developing countries and first in Africa. While the legal frameworks of many countries in Africa (and throughout the world) permit the right to vote for all citizens, in reality, diaspora citizens are disenfranchised. This is because of a lack of willingness on the part of the authorities that organize elections and procedures that will ensure the fulfillment of the right. Because Nigerians in the diaspora bring in substantial foreign exchange through remittances, affording these citizens the right to vote symbolically integrates a key economic group into the public affairs of the nation. When Nigerians abroad are allowed to vote, they feel they belong; it is, after all, an exercise of citizenship and civil duty. It is also a way to make sure that such citizens, especially students and professionals, who are assets to be wellbeing of the country, are not lost to other countries. This paper will examine recent trends in diaspora voting and the need to entrench same in our electoral process.

The Logic of the Marketplace of Ideas in the Internet Age: Implications for National Security, Freedom of Expression and the Radicalisation Agenda of Terrorists

Chinedu Christian Odoemelam, PhD
Department of Mass Communication & Associate Faculty Member, Buratai Centre for Contemporary Security Affairs, Igbinedion University, Okada

Abstract

In 1644, John Milton, in his treatise, Areopagitica, and in defense of freedom of expression, argued that truth and falsehood should be allowed to coexist in the society because, ultimately, truth will emerge in the competition of ideas in a free, open and transparent public discourse and that, ideas and ideologies will gain widespread acceptance depending on their superiority or inferiority. However, this paper raises questions about the sustainability of the logic of the marketplace of ideas within the context of freedom of expression, protecting national security and public order and the heightened abuse of the internet media by terrorist groups. This is even as extant literature suggest that, the internet platform has become potent in the radicalization agenda of terrorist groups who combine texts, audio and visuals in their propaganda peddling and messaging. Manuel Castell's theory of the Network Society provides a framework for the conceptualization of the key variables and analysis of the data in this paper. The network society is reflective of a hyperactive social society and not a society of isolation, where social structure is made up of networks powered by micro-electronics-based information and communications technologies. The present paper is unique because, though there are many studies on the use of the internet for terrorism purposes; very few have interrogated the contributions of the notion of freedom of expression (i.e marketplace of ideas) to the challenges society grapples with in the use of the internet for propaganda by terrorist groups. The paper sheds light in that regard, and furthers the debate on the nexus between the use of the internet, freedom of expression and national security. The outcome of the discussions underline the need for policy response to highlight the urgency of internet information supervision and to emphasis a more nuanced and intense counterterrorism communication strategies.

Abstract

Religion is one of the perennial causes of conflict and crises in Nigeria. The religious crises witnessed in Nigeria have largely been between adherents to Christianity and Islam as both faiths compete to dominate the social space. Christians and Muslims in Ilorin engaged in violent clashes over the use of hijab by female Muslim students attending grant-aided Christian mission schools. The media attention given to the hijab crisis varied from one publication to the other. It is against this background that this study examines the 2021 hijab crises in Kwara State which pitched Christians against Muslims in the state and beyond. The study hinges on the theoretical postulations of framing theory and it employed Critical Discourse Analysis as methodological paradigm. Findings from the study revealed that Daily Trust newspaper which is owned by a Muslim framed its reports in favour of Islam while Guardian newspaper which is published by a Christian framed its narratives in favour of Christians. The study concludes that the hijab crisis is only a metaphor for the larger war between Islam and Christianity in Nigeria. The study urges religious leaders and media workers should play down religious fault lines in their narratives on conflict.

Abstract

The dimensions of national security in the economics, politics, social, educational, physical and other aspects of aegis of insurance of life and properties in the nation are daunting and overwhelming. The Nigeria economy is dizzy, the politics although seems stable and unperturbed by the military coups still unhegemony and inconsistent in policy and programmes implementation, there are social vices hither and thither, insurgencies, book haram, kidnapping, maiming, raping, ritualism, unemployment, bad social infrastructures, poor students' academic performance tainted with technological aided examination malpractices culminating into poor scientific and technological advancement which invariably delimit national security and national development. Need to revamp qualitative science and technological education at the basic level, enhance professional teacher development programmes for efficient teaching and learning at all tiers of education, then, national security can be attained when the tides of examination malpractices wane, the graduates of tertiary institutions are employable and entrepreneurial then, social vices shall be abated and Nigeria shall be adequately secured.

Keywords: National security, Science, Technology, Educational development
Abstract

This study investigated the extent to which social media is used to improve library services in tertiary institutions in Ahmadu Bello University Library, Zaria. The survey research design was used for the study. The population of the study consisted of all 204 professional librarians in Ahmadu Bello University Library, Zaria. Total enumeration was used for the study. A self-structured questionnaire was used for data collection. Findings revealed that Facebook (95.1%) and WhatsApp (94.2%) are commonly used by librarians followed by respondents who also indicated that YouTube (83%), Twitter (85.3%), Google+ (83.3%) and LinkedIn (71%) are moderately used in the library. Also, the services provided by librarians were e-reference services, database search, online user education and e-reader services among other available library services. This indicated that the provision of library services was moderately low in the library while findings revealed that available social media tools were not fully utilized by librarians in Ahmadu Bello University Library, Zaria. The study concluded that social media use helps librarian on service delivery of librarians in Ahmadu Bello University Library, Zaria. The study recommended that professional librarians should promote e-library services such as e-current awareness services, selective dissemination of information, instant messaging services and distance learning services using diverse social media tools such as Pinterest, Ning, Flicker, Del.icio.us, Instagram and Social Bookmarking that were sparingly used in the library.

Podcasting and Vodcasting as Tool for Media Communication: A New Frontier for Social and Security Awareness

Nwabueze Ekwem & Ogbe, Sunday John B.Sc. M.A PhD
1Department of Mass Communication, The Federal Polytechnic, Nasarawa, Nasarawa State
2Institute for Development Research and Training (IDRT), Ahmadu Bello University, Zaria

Abstract

Podcasting and Vodcasting have become the new normal in information content creation and dissemination. These channels of communication over the internet have been embraced by the educational and entertainment sectors in the sharing of knowledge, musical audio and video files to the public using mediums such as YouTube and Spotify among other numerous channels. Popular media houses like Channels, African Independent Television (AIT), Voice of Nigeria (VON) and NTA and musical artists in Nigeria like Tuface, Davido, Wizkid, and Burna Boy to name a few. With the rising level of insecurities in Nigeria, the use of Press releases and information on public service broadcast channels is considered less effective. Thus, the successes recorded with the adoption of Podcast and Vodcast, especially with regards to information sharing during the Covid-19 lockdown made it imperative for the solicitation of these new norms of communication to be adopted in the creation of awareness as a way of intelligence gathering and sharing. This paper is an expository discourse to further drive the need for the choice of podcast and vodcast to promote social and security awareness.

An Appraisal of Legal and Administrative Feasibility Study Of Capital Investment

Iheme C. C. & Chiagorom C. F.
Department of Estate Management, Federal Polytechnic Nekede, Owerri Imo State

Abstract

Feasibility studies are normally conducted to justify investments in infrastructure projects. Due legal diligence process should ensure that the project is procured in accordance with current legal requirements, both in domestic and international terms, and that key aspects of the project must have been analyzed from a legal administrative perspective. This study was conducted in Owerri the capital of Imo State. The target population for this study was Consultant Quantity Surveyors and Estate Surveyors and Valuers. Selective sampling technique was use to determine the size of study population. Closed and Structured questionnaires were designed and distributed to the targeted population. Fifteen (15) questionnaires were administered to Quantity Surveyors out of which only eight (8) were fully filled out and retrieved; twelve (12) were administered to Estate Surveyors and Valuers out of which only eight (8) were fully filled out and retrieved and all were employed for the validity of the study. Four research questions were provided and Percentage and Mean Value statistics were used to analyse collected data. Result of the analysed research questions shows that feasibility consultants do not use wider parameter in evaluating legal implications of capital investments in Nigeria. They are not also familiar with the modern appraisal techniques that give better results. The research concludes that comprehensive legal appraisal of feasibility studies clearly put to check critical issues in capital investment that if neglected, will lead to serious barriers to implementation of development projects. Modern viability evaluation techniques that incorporate risk sensitivity should be adopted to ensure that capital investments do not fail.

The Role of Information Technology in the Development of the Nigerian Economy

Obi Nneka Obiageli
Federal University of Petroleum Resources Effurun, Delta State, Nigeria

Abstract

In today's society, technology is central to human activity. Every work process involves some form of technology; every human activity has technology intertwined in the process. It also plays a key role in the development of national economies such as wealth creation, improvement of the quality of life, and real economic growth and transformation in any society. This paper aims to examine the role of technology in the development of the Nigerian economy. This is desktop research. Data are obtained from secondary sources and analyzed using content analysis. The paper concludes that the Nigerian economy must be driven by technology in order to expand production and manufacturing. It identifies key sectors that will drive the nation's economy including agriculture, textile, mining, and trading. It recommends that the country must invest in research and development institutions, and encourage interest in science and tech at the grassroots.

Examining School Discipline as a Contemporary Issue of Nigerian Educational System

Nwaokwa Emilia Okechi (PhD)
Department of Office Technology and Management
Federal Polytechnic Nasarawa, Nasarawa State

Abstract

Discipline among students has deteriorated to the point where it has become a socio-political problem. It is one of the most pressing issues confronting Nigeria's educational system today. The goal of this research is to look at school discipline and make policy recommendations that are successful. The majority of the data came from school discipline related literatures. The research revealed that punishing student is proportionate to the offense committed. The study came to the conclusion that instructors and school administrators should aim to minimize the negative feelings caused by decisions by judging the offending behaviour rather than the person. Both student and staff self-attitude and participation are necessary to improve academic success.

Dutch Diseases and Resources Curse: Key Regulatory Challenges and Opportunities Associated with Extractive Industries in Nigeria

Raimi Morufu Olalekan & Odubo Tonbra Robert

1Department of Community Medicine, Environmental Health Unit, Faculty of Clinical Sciences, 2Department of Sociology, Faculty of Social Sciences, Niger Delta University, Wilberforce Island, Bayelsa State, Nigeria.

Abstract

The Dutch disease phenomenon can be seen in a country that discovers a significant natural resource deposit and begins exporting it on a large scale. As a result, the country's currency rises, reducing the competitiveness of its traditional export sectors, including agriculture. The Dutch disease is regarded as one of the primary causes of the natural resource curse. The resource curse refers to the paradox that countries with abundant natural resources frequently fail to grow as quickly as those lacking such resources. Nigeria exemplifies this situation in that, despite its wealth in oil, gas, and minerals, its economic development lags behind the rest of the world. Furthermore, the negative effects of natural resource exploitation on human rights and the environment are obvious. Other resource-rich countries, such as Norway and Chile, have achieved high levels of development, transforming their resources into a blessing. Thus, the purpose of this research is to create a space for critical dialogue in shaping and responding to the resource curse phenomenon in the Nigerian socioeconomic context, as well as to bring years of experience in extractive industries research and policy to break down barriers in the extractive industries research field and deal with a wide range of key opportunities and regulatory challenges related to the extractive industry in a collaborative manner. It will then attempt to explain why the absence of a mechanism for effective civil society engagement is the primary reason Nigeria is struggling to overcome the negative consequences of having an extractive sector. The current ad hoc engagement process makes holding government institutions and public servants accountable difficult for civil society and the private sector. As a result, there is a need for a strong and consistent policy, legal, and contractual framework to maximize resource gains and ensure companies operate in a socially acceptable and sustainable manner. It concludes with recommendations for national governments, international civil society, international organizations, and the extractive industry on how best to escape the resource curse.

Impact of Climate Change on Rainfall Patterns and Implications for Agricultural Production and Adaptation Strategies

Oga, I.O., Uche-Nwachi M.N., Uche Nkechi & Odimba V.O.

Department of Agricultural Technology,
Akanu Ibiam Federal Polytechnic, Unwana
Ebonyi State, Nigeria

Abstract

Climate change has adversely impacted natural resources, food, security, human health, the environment, physical structures, among others. The impacts are evident in the threats posed by drastic changes in rainfall patterns, temperature, relative humidity, radiation and general alteration in the trends of climatic elements. The purpose of this research was to access data/information on rainfall patterns for the period (1972-2003) and (2016-2017). The data/information were sourced from secondary sources. The data/information sourced were analyzed using descriptive statistics. The result shows that there have been deviations from the pattern of rainfall. The result also shows that rainfall was experienced more in the period (2016-2017) as compared to the period (1972-2003). Recommendations, among others, included that there should be shift in the planting dates of some crops, timely planting of crops, planting of short cycled seeds during short periods of rainfall and cultivating “edible” cover crops as “must crops” during the cropping season.

Promotion of Smart Toilet Products Using Simulation and Modelling Towards Open Defecation FTEE Nigeria

Odetoye Adeola Sunday, Kabiru Zakari, Ibrahim Musa, & Osunkunle AbdulMageed

1Department of Architecture, Ladoke Akintola University, Ogbomoso, Oyo State. 2,3,4Department of Architectural Technology, Federal Polytechnic, Bauchi, Bauchi State

Abstract

The sensitization and promotion of smart toilets can never be underestimated in Nigeria in which most communities have not actually migrated to the next higher level in terms of hygiene as open defecation (OD) is still a norm. To overcome this challenge there is the need to shift from the use of local unimproved pit latrines to something innovative and have suitable latrine designs that would not only be cost-effective, environment-friendly and easy to construct but also would be acceptable to people especially less privileged. Arise the concept of low-cost but high-quality toilets called 'SMART TOILETS' with adequate awareness. As a result of this, the Federal, State and Local governments are presently trying to achieve safe hygiene practices for a collective responsibility, sustainable waste management and benefits to the society in order for the community to migrate from OD to ODF (open defecation free) Nigeria by 2025 through 2030. The non-availability smart toilet technology such as a good substructure, midstructure and superstructure requires conviction and customers' satisfaction. Hence, the methodology of this work entails the design, computer based simulation and physical modelling with other future possibilities that will provide a lasting solution to OD. It has been recommended that government and stakeholders should strictly enforce and implement the laws that will also promote 'Use The Toilet Campaign' towards positive development in Nigeria by providing more improved Smart toilets products for cost effective toilet structures, resolution of toilet issues and challenges.

Effect of Banditry Activities on Production of Leather Goods in North West Nigeria

1 Olatunji, Tunde E., 2 Dauda, Adamu Abubakar, 3 Jungudo, Maryam Mohammed, & 4 Dogara Nasiru Danladi

1 & 2 Directorate of Academic Planning, Nigeria Institute of Leather and Science Technology, Zaria
3 Department of Footwear Technology, NILEST, Zaria
4 Nasarawa State Board of Internal Revenue, Lafia.

Abstract

The pervasive banditry and its associated threats to security and economy at large, have enveloped production of leather goods in the Northwest region of Nigeria, particularly, Zamfara, Katsina, Kaduna, Sokoto and Niger States, have become a worrisome national security issue of public concern. This paper therefore examined the effect of banditry activities on Nigeria’s security, focusing on the North-West region of Nigeria. The paper adopted descriptive method, made use of secondary sources of data while the Queer Ladder Theory (QLT) and Frustration-Aggression Theory were employed as the explicatory framework. The paper thus recommended, among others, that, there should be adequate supply and installation of modern technology as well as increased surveillance while border security personnel are urgently required to check trans-border crimes, which are part of the igniting factors accentuating banditry in north west Nigeria, also, to ensure that the future of the leather goods industry is secured, appropriate policies and the very fundamentals of a large raw material supply and a large pool of skilled labour to guarantee high quality production should be put in place.

Effect of Insecurity on Economic Activities in North-West Nigeria

Olatunji, Tunde E.
Directorate of Academic Planning,
Nigeria Institute of Leather and Science Technology, Zaria

Abstract

The alarming level of insecurity in Nigeria has fueled the crime rate and terrorists' attacks in different parts of the country, leaving unpalatable consequences for the nation's economy and its growth. Over the last four decades, Nigeria's North West has witnessed waves of violence including sectarian clashes, Islamist militancy and electoral violence. This paper therefore examines the effect of insecurity on economic activities in north-west Nigeria. The study revealed that the productive aspect of most manufacturing business depends largely on the availability and regular supply of raw materials for production, of which insecurity has cut off the supply of such raw materials hence, jeopardizing production activities. Other matters of concern include, insecurity affects marketing of finished product as there is a continuous exodus from areas of insecurity. There is also an increase in security spending as most business organizations operating in Nigeria spend a lot in maintaining private security outfits. The destruction of their business building, properties and equipment is tantamount to loss of capital which has ruined not a few businesses in north-west Nigeria. The study suggests that Nigeria's federal authorities and state governments in the North West should work more closely, not only to heal longstanding rifts within communities and curb violence, but also to address the structural causes of insecurity in the region.
