SCOPUS RESEARCH TRAINING AND CONFERENCE / 11TH ACADEMIC RESEARCH CONFERENCE

THEME (1): Methodology Skills in Writing Research for Scopus & Scimago Journals

THEME (2): Research Issues in Social and Management Sciences, Education Environment & Humanities

DATE: Tuesday 10th – Wednesday 11th October, 2023

TIME: 9:00am

VENUE: University of Ibadan, Nigeria

CONFERENCE LOC:
Dr. Paulina Oludoyin Adeniyi
University of Ibadan, Nigeria
(+234 7068839933)

CONFERENCE PANEL
Asso. Prof. Iyabrade Ikporukpo
HOD, Department of Political Science
Niger Delta University, Bayelsa

Dr. Bassey Anam
Institute of Public Policy & Admin.
University of Calabar, Nigeria

Prof. Elizabeth Adebayo
MAUTECH, Nigeria

Prof. Thomas Traynor
Wright State University, USA

Prof. Lars Kolvereid
Bodo Graduate School of Business,
Norway

Sr. Prof. Ezeh Mary-Noelle Ethel Ngozi
Chukwuemeka Odumegwu Ojukwu University
Anambra State, Nigeria

Dr. Babajide Veronica
University of Lagos, Nigeria

Dr. Kabuoh Margret
Babcock University, Nigeria

Prof. Fatile Jacob Olufemi
Lagos State University, Nigeria

CONFERENCE PROGRAMME

DAY ONE – Tuesday 10th October, 2023

OPENING SESSION/PLENARY
Conference Registration - 8:00am – 9:00am
Opening Prayer/Welcome Remark - 9:00am – 9:15am
Institutional Brief/Chairman's Opening Remark - 9:15am – 9:30am
Research Training - 9:30am – 12noon
Launch Break/Group Photograph - 12noon – 1:00pm
Plenary Session - 1:00pm – 4:00pm
Policy Review Session - 4:00pm – 5:00pm

DAY TWO – Wednesday 10th October, 2023

OPENING SESSION/PLENARY
Conference Registration - 8:00am – 9:00am
Opening Prayer/Welcome Remark - 9:00am – 9:15am
Institutional Brief/Chairman's Opening Remark - 9:15am – 9:30am
Research Training - 9:30am – 12noon
Launch Break/Group Photograph - 12noon – 1:00pm
Plenary Session - 1:00pm – 4:00pm
Policy Review Session - 4:00pm – 5:00pm
Welcome!

International School of Advanced Research Study

We are glad to introduce you to our Online Professional Certificate and Degree courses on “Research Methodology and Statistical Techniques” in affiliation with International Asian Universities and European Research Organisations. We believe you are the right person for this course. It is 100% online and flexible.

Earn a Professional Certificate & Degree in

RESEARCH METHODOLOGY & STATISTICAL TECHNIQUES

International School of Advanced Research Study (ISARS) partners with institutions to train and certify researchers on various themes in Research Methodology and Statistical Techniques. We wish to partner with your University by organizing research training workshop for graduate students and academic staff. A detailed proposal will be sent to you at your request. Send an email or call the Ag Registrar for inquiries.

Timeline for Manuscript Corrections and Journal Publication

The timeline for manuscript assessment and publication is as outlined below:

1. The Plenary/Technical session is compulsory for all conferee. You are advised to note the comments pointed out by the Chairman of the Technical Session and other members of the plenary group. This will help you effects corrections as expected.

2. Corrections of manuscript(s) (full papers) must be effected and submitted within 2 weeks after the conference. All submission must be made to: conferenceseries01@gmail.com

3. The Conference Professional Peer Review Editorial Panel (CPPREP) will meet 2 weeks after the league conference to review papers. This usually takes one week, after which the papers are forwarded to Google scholar International Standard Peer Review Research Council for professional and disciplinary blind peer review and plagiarism check. Usually this takes about 3 weeks.

4. Letter of Papers Acceptance and Journal Publication will be issued to author(s) on the 6th week after the conference. Acceptance will be in three forms:
   a. After peer review, papers with less than 50% accuracy level will be rejected. Author(s) will be required to re-write the paper based on observations.
   b. Secondly, papers with 51 – 80% accuracy level will be accepted for publication, but with minor corrections effected by the institute.
   c. Finally, papers with 81 – 95% accuracy level will be accepted for publication with minor corrections effected by the institute.

5. On acceptance of paper for publication, author(s) will be required to make PAYMENT for paper publication/ pagination (hard print and online) and courier. Payment must be done within 2 weeks of notification of acceptance. Authors will receive their published journals within 10 weeks after the conference.

6. Accepted papers will be published in International Scientific Disciplinary Research Journals with high level Impact Factor (in hard print and e-version). Published journals will be indexed in Google scholar and other online research directory.
Guidelines for Manuscript Submission

Important Notice
Submitting your manuscript for assessment and publication in any of the International Journal Series means that your work has not been published elsewhere in any other journal, book or in a book chapter, be it printed online (except in the form of an abstract or an academic thesis). The editor(s) of the journal(s) have the right to edit or to alter all contribution, but authors of the submitted work will receive proof before the publication of their work.

Submission of Manuscripts
Manuscript should be submitted to the Editor in Chief, typed in English with Times New Roman font size 12, doubled space with 1” margin at all sides of A4 paper. Manuscripts should not exceed 14 pages. Articles for publication should be sent to the Editor, International Standard Research Publishing through the journal.

E-mail: conferenceseries01@gmail.com

Manuscript should be legibly written with clear symbols, drawings, photographs, chemical structures to ensure clarity and easy reproduction. Authors are urged to pay attentions to tables, figures and references which should be done in the correct format and appropriately cited in the main text.

Format of Paper
The paper should include: Title, author(s) name(s) (surname in full) and address (es), an abstract not exceeding 250 words, a few key words and the main paper. The main paper should have an Introduction, Materials and Methods, Results and Discussion, Tables and Figures, Plates, Conclusion, Acknowledgment, References. If the paper has more than one author, the first on the list is the Correspondence author.

References
The reference style should be APA format.

Review Process
Articles for publication will be peer reviewed by 2 or 3 reviewers to ensure accuracy. Guided by the reviewer's comment on a paper, the decision of the Board is final.
Copyright
Upon acceptance of a paper by the journal, the author(s) have automatically transferred copyright of the paper to International Standard Research Publishing. The transfer will ensure widest possible dissemination of information.

Charges
Manuscript must be submitted along with a processing fee. Upon acceptance of a paper for publication, the corresponding author must submit the corrected paper and pay a publication fee of $200 (USD) only. Corresponding authors shall receive one copy of Journal and could also download articles from the Journal's website.

Publication Ethics and Publication Malpractice Statement
Publication decisions: The editor is responsible for deciding which of the articles submitted to the journal should be published. The editor may be guided by the policies of the journal's editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editor may confer with other editors or reviewers in making this decisions.

Confidentiality: The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Quantitative Approach in Management Science Research: Issues and Policy Options

Imoh Imoh-Ita
Department of Public Administration, Faculty of Management Sciences
Ohio Akpa Campus, Akwa Ibom State University

Abstract

Quantitative approach is central to current discussions in management science research. For some, management science research especially public administration is less quantitative. For others, management science research adopts quantitative approaches. Faced with this major research contention, this paper aims to make a new contribution, which discusses and clarifies quantitative approaches in management science research. There is now a considerable and diverse scholarship on quantitative research methods in management science, including questions of data collection, and analysis, focusing on gathering numerical data and generalizing it across group of people or to explain a particular phenomenon. Yet the practical implications or application of quantitative approaches are still contested as little is known among scholars about the specific empirical or quantitative approaches in management science. Importantly, the broader terrain within which management science research is conducted is rapidly changing bringing new challenges to the understanding of quantitative approaches. This paper seeks to fill this research gap, it builds on content analysis methodology and shows that management science research adopts quantitative methods, which emphasizes objective measurements and the statistical, mathematical, or numerical analysis of data collected through polls, questionnaires, and surveys, or by manipulating pre-existing statistical data using computational techniques. Our findings show that quantitative approach is multidisciplinary in the fields such as public policy analysis, marketing and public administration. In the alternative, the paper contributes to the understanding and engagement of researchers in management science by addressing the relationship between management science and quantitative approaches, and also with policy makers and researchers involved in the debates about the role of quantitative research in management science for future research. Conclusion shows how the study will help better understand the importance of management science research for researchers and policy-making in the larger context of management science research.

Research Issues in Fine and Applied Arts Education and Industry: Roadmaps for Economic Revitalisation

Osadebe Sunday Solochukwu
Department of Fine and Applied Art Education
School of Vocational Secondary Education

Abstract

The practice of fine and applied arts revolves around promoting crafts activities as well as providing a consistent means of livelihood for persons who have found interest in creativity. However, due to many families' economic hardship, tertiary courses are often measured in terms of their perceived economic viability, as a result art courses are not seen as desirable by most young persons who have flair for it. These lingering challenges have continued to diminish the interest of would-be young artists in pursuing career in the field, resulting in a reduction in new students' enrolment into art schools and department of fine arts in tertiary institutions. As one of the roadmaps to education system need be tailored towards what the contemporary industry demand, hence the thought of rebranding fine and applied art as well as exposing undergraduates to some of the industrial needs of their field and at the same time preparing them for their future self-reliance. The paper seeks to project relevant workable achievable strategies to resolves these challenges. It also takes exception in the fact that fine and applied art education of various institution of higher learning, stakeholders and those saddle with responsibilities of educational administration will be responsive to those challenges that seem to negate to large extent the optimum realities of the nation's aspirations.

An Exploration of Nigeria's Food Security Dilemma

Isah Shehu Mohammed, Aisha Ahmad Aliyu & Ameer Sanusi

Department of General Studies, School of General Studies, Federal Polytechnic, Bauchi, Bauchi State - Nigeria

Abstract

This paper explores Nigeria's dilemma in her strive to achieve and sustain food security which is a top priority of every state, irrespective of its national, regional and global strength in economic, political, military and other perspectives. Currently, Nigeria being the dominant African state is in a dilemma of not only achieving, but also sustaining her food security as many parts of the country rely on humanitarian assistance and or food importation with stressed, famine and crisis situations. The paper is qualitative and collects data from secondary sources as journals, books, official reports, international Governmental and Non-Governmental statistics. The dilemma of Nigeria's food security centre around several factors and issues with interplay by both natural and human factors which altogether not only threaten but weaken the drive to achievement and sustenance of food security. The study explores the dilemma with multi-dimensioned issues of climate change, misconception of food security itself, inconsistent, non-sustainable and incoherent government policies on agriculture and food, faulty and un-uniformed land tenure system and management, food wastages of nearly 30% of total food production, conflicts, proliferation of fake and adulterated agro-allied chemicals in the agro-allied industry, poor usage of agricultural technology, unfavourable market conditions, plant and animal diseases, access to financial resources, rapid population growth without commensurate food production, food poisoning, among others. For Nigeria like other states, food security is both complex and diverse to conceive, manage and achieve, but it is not what can be achieved ordinariy and not over short period of time. Concerted public and private policies and efforts, strong public and private commitments of energy, time, and huge resources have to be made.

Keywords: Agriculture, Dilemma, Food security, Land, Nigeria.
Problems in Carrying Out Research in Libraries: The Case of Colleges of Education Library Users in Delta State, Nigeria

Governor, A. Henry
The Library, Federal College of Education (Tech.), Asaba, Delta State.

Abstract

The aim of the study is to point out problems of carrying out research by students in Colleges of Education via the libraries in Delta State. Libraries have been adjudged as the heart of tertiary education in which Colleges of Education is a member. College libraries have started digitalizing its collections as well as acquisition of digital resources in order to promote quality educational research. This paper explains the problems faced by researchers in carrying out research in Colleges of Education libraries in Delta State, the role of libraries in promoting quality research through digital gadgets, challenges facing researchers in Colleges of Education libraries in a bid to meet their research needs as well as strategies to promote quality research in libraries through digital resources were discussed succinctly.

Gbemisola O. Samuel & Olatokunbo D. Salami

Department of Economics
Lagos State University, Ojo

Abstract

This empirical research examines the determinants of wage rates in Nigeria from 1991 to 2020. The study utilizes ordinary least squares (OLS) regression to analyze the relationship between minimum wages and key factors, including inflation rate, unemployment rate, education, labor productivity and experience, and other estimation techniques using (E-views) to forecast. The dataset is obtained from the Nigerian National Bureau of Statistics (NBS). The objective is to provide insights into wage determinants in Nigeria and offer guidance to policymakers to prioritize equal access to quality education and create an inclusive workforce that promotes equal opportunities for all individuals and help to implement measures that combat inflation and reduce unemployment rates. Controlling inflation through prudent monetary policies and implementing targeted fiscal policies can help stabilize prices and protect workers' purchasing power by promoting job creation and implementing labor market reforms to help reduce unemployment rates and create more employment opportunities, leading to improved wage rates. The study suggests that policymakers should prioritize improving educational attainment, particularly among women, tackling inflation, and unemployment, and implementing policies to foster the growth of high-wage industries. By addressing these variables, policymakers can effectively raise wage rates in Nigeria and contribute to overall economic improvement.

Keywords: Wage rate, labor market regulations, industry, education, and gender.
Research Issues in Social and Management Sciences, Education, Technology, Environment and Humanities

Eborka, Nkechi Faith
Dennis Osadebay University

Abstract

Research is the systematic investigation of a phenomenon, and the study of materials and sources in order to establish facts and reach new conclusions. For any society to achieve growth, research must be a fundamental component of that society, it is little wonder therefore that a lot of energy is dispelled into the conduction of meaningful research. That is why this paper, will attempt to look at the challenges that researchers in the humanities face, most especially historians in an attempt to reconstruct past events, the paper will also highlight the importance of these “researches” to posterity and ways that that prospective researchers can combat this challenges that researchers face in the humanities.

Keywords: Research, Issues, Humanities, Challenges, Funding.
Healthcare Financing Effect on Economic Growth in Nigeria

Inim, Victor Edet, PhD & Onunkwor, Christopher Ifeanyi
Department of Economics
Nile University of Nigeria, Abuja

Abstract

This study examined the effects of healthcare financing on economic growth in Nigeria using quarterly data from 2000 to 2022. In a bid to achieve this broad objective, three healthcare financing variables, namely, domestic government health expenditure, domestic private health expenditure and out-of-pocket health expenditure were used to explore their effects on economic growth in Nigeria. Data employed for the study were sourced from the Central Bank of Nigeria (CBN) and the World Bank's World Development Indicators (WDI). The study used the Auto-Regressive Distributed Lag (ARDL) bounds testing procedure to estimate the model, given that the data used for the model estimations were integrated of order I (1) and I (0). The results revealed no long-run relationship amongst the variables. The ARDL short-run estimation revealed that domestic government health expenditure has no significant impact on economic growth in Nigeria, domestic private health expenditure has a positive and significant impact on economic growth in Nigeria, while out-of-pocket health expenditure has a negative and significant impact on economic growth in Nigeria. This study established that both domestic private health expenditure and out-of-pocket healthcare expenditure have significant short-run effects on economic growth in Nigeria. In view of the above, the study recommends increasing the overall expenditure on health, albeit a target-based health expenditure, that is associated with good governance of healthcare funds.

Macroeconomic Variables on the Performance of Small – Medium Enterprises: The Financing Decision

Udoh, Francis Sylvanus, Inim, Victor Edet, Emieseifa James Agama & Aarti Sharma

Abstract

This study set out to investigate the effect of macro-economic variables on the performance of SMEs in Nigeria; the financing decision in response to the growing emphasis on the role of Small and Medium Enterprises (SMEs) in fostering economic growth. The main goal was to ascertain the effects of several factors on SME performance, including the currency rate, interest rate, inflation rate, foreign direct investment, and degree of economic openness. The study employed a quantitative approach, utilizing a series of diagnostic checks, cointegration results, and unit root tests and ARDL as methods to scrutinize the interrelationships among these variables. Findings highlighted the exchange rate's negative and significant impact on SME performance. SMEs were seen to be particularly vulnerable to rapid exchange rate fluctuations, which in turn affected their operational costs and competitiveness. Conversely, the interest rate showed no significant positive impact on SMEs, suggesting that current monetary policy may not be optimally supportive of this business segment. Similarly, the inflation rate's role was found to have negative and insignificant effect on SME performance. In a more positive light, foreign direct investment (FDI) displayed a clear positive and significant effect on SMEs, indicating its potential as a catalyst for growth and technological transfer. Lastly, the degree of economic openness was found to have a robust positive influence on SMEs, with open markets facilitating greater trade and access to international markets for Nigerian businesses. Specific recommendations were then drawn from these findings. Among these, stabilizing the exchange rate and creating an investor-friendly environment to attract more FDI were paramount. Furthermore, the Central Bank of Nigeria was advised to consider revisiting its interest rate benchmarks and anti-inflationary strategies to create a more conducive atmosphere for SMEs. Lastly, the importance of tapping into the benefits of economic openness through revisited trade policies and enhancing local SMEs' export potential was underscored.

Keywords: Exchange Rate, Interest Rate, Inflation Rate, Foreign Direct Investment, And Degree of Economic Openness and SME performance
